

Dear Resident

Hampshire County Council is carrying out a major work programme to improve street lighting across Hampshire, in partnership with SSE Contracting.

This vital work will ensure that lights in both urban and rural areas meet the latest standards, including being more energy efficient. Old lanterns and lamps will be replaced by modern lighting that shines white light directly onto roads and pavements.

Within the next four weeks we'll start replacing the lights in YOUR street.

What happens next?

The lamp posts in your road are relatively new and do not require changing, therefore only the lantern will be replaced with a more energy efficient and controllable unit.

Will the new lantern shine more light into my window?

The majority of modern lanterns have better optical controls than existing lanterns, designed to limit or counteract intrusion into properties. However on occasions where a light shield is felt necessary you can request one by e-mailing hampshirepfi@ssecontracting.com

For street lights that have been replaced as part of the PFI (Private Finance Initiative) a charge will not be incurred to fit a light shield.

If you have any other questions please contact us on one of the options below:

- Phone Hampshire County Council: 0845 603 5633
- Website: www.lightsoninhampshire.co.uk
- Email: hampshirepfi@ssecontracting.com
- Or write to us at
