To neighbouring areas & London.

To rest of UK
Destinations
=15,403 resident workers.
Offshore Installations
& Outside UK = 3,137

In-commuting

From neighbouring areas & London.

From rest of UK
Origins
= 22,018 workers

Commuter Flows and Main Method of Travel to Work

The Census 2011 commuter data measures workers aged 16yrs+, while Census 2001 data measures workers aged 16-74yrs. Comparisons between the census numbers should be used with caution due to the difference in age bands, natural population growth over time and economic conditions at the time of census collection which affect worker numbers. The percentage values provide a better relative comparison, although not strictly measuring like-for-like.

Top Five Local Authority Destinations of Out-commuters

Number and percentage of total employed Resident Workers

Table ranked by Census 2011 figures with the figure for the same area given for 2001

Top Five Local Authority Origins of In-commuters

Number and percentage of total employed Workplace Workers

Table ranked by Census 2011 figures with the figure for the same area given for 2001

Main Method of Travel to Work
