2011 Commuter Flows

2011 Resident Workers¹: 55,875

Live & work in the district²: 23,778

No Fixed Place: 5,495

Out-commute³: 26,602

2011 Workplace Workers¹: 46,958

Live & work in the district²: 23,778

No Fixed Place: 5,495

In-commute: 17,685

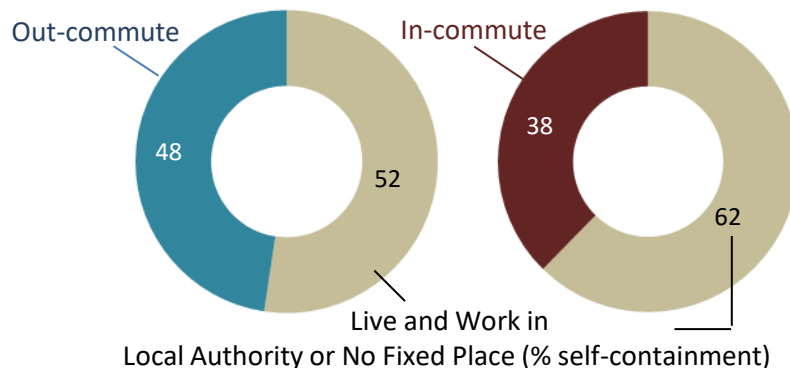

2011 Net Commuter Out flow⁴: 8,917

¹Aged 16yrs plus in employment the week before the 2011 Census. ²Commute within area or Home workers (work mainly at or from home), ³Includes Offshore and Outside of UK, ⁴The difference between Out and In commuting.

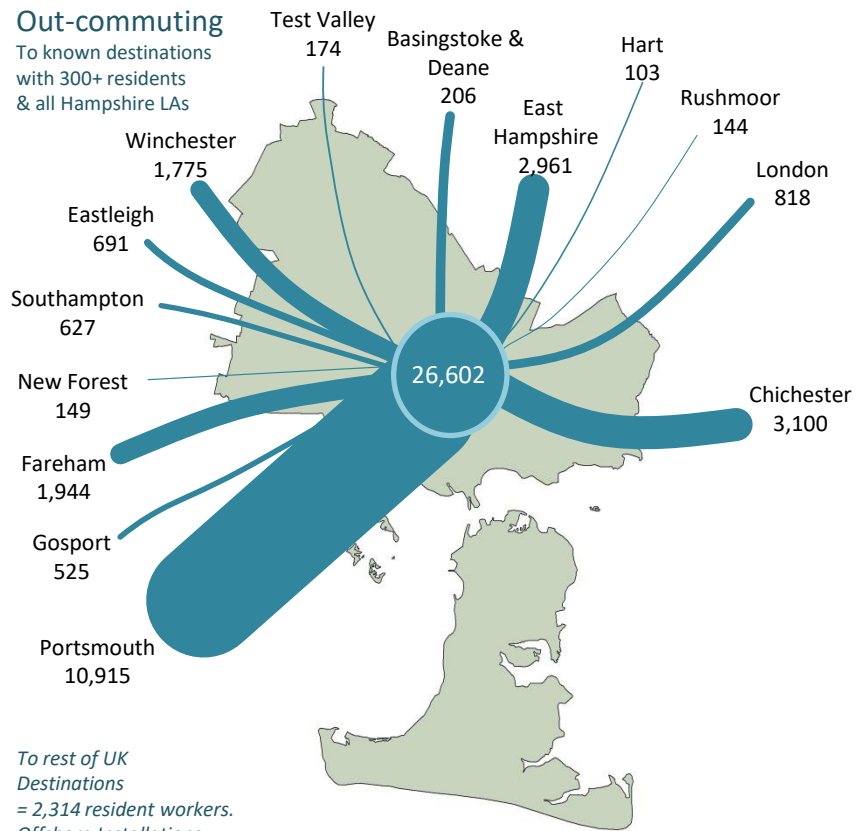

% of Resident Workers

% of Workplace Workers

Out-commuting

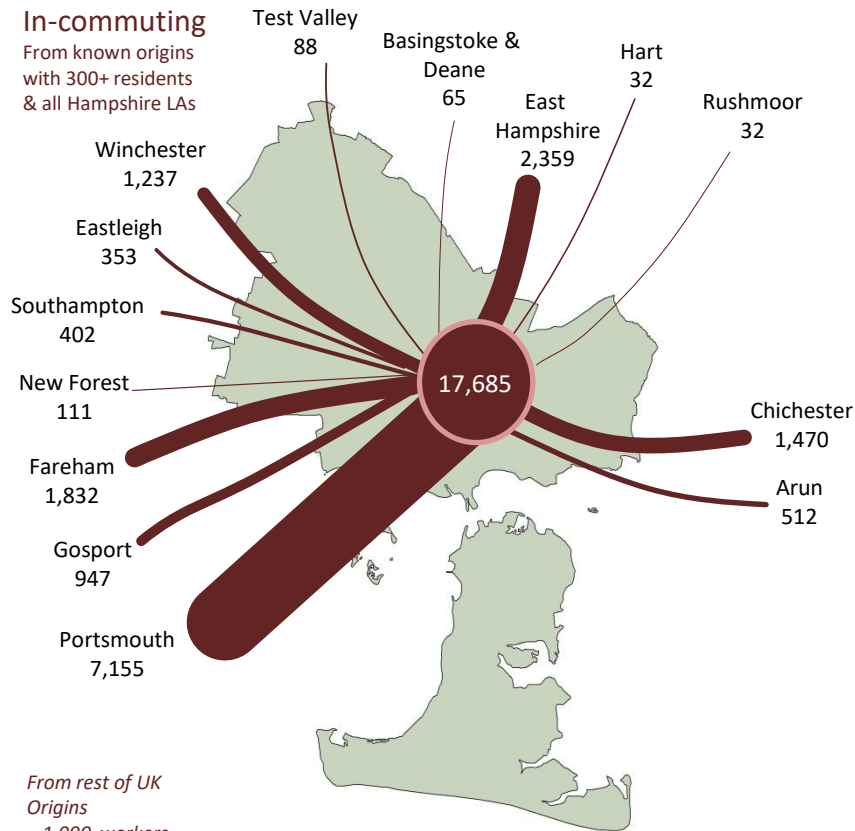

To known destinations with 300+ residents & all Hampshire LAs

To rest of UK Destinations = 2,314 resident workers. Offshore Installations & Outside UK = 156

In-commuting

From known origins with 300+ residents & all Hampshire LAs

From rest of UK Origins = 1,090 workers

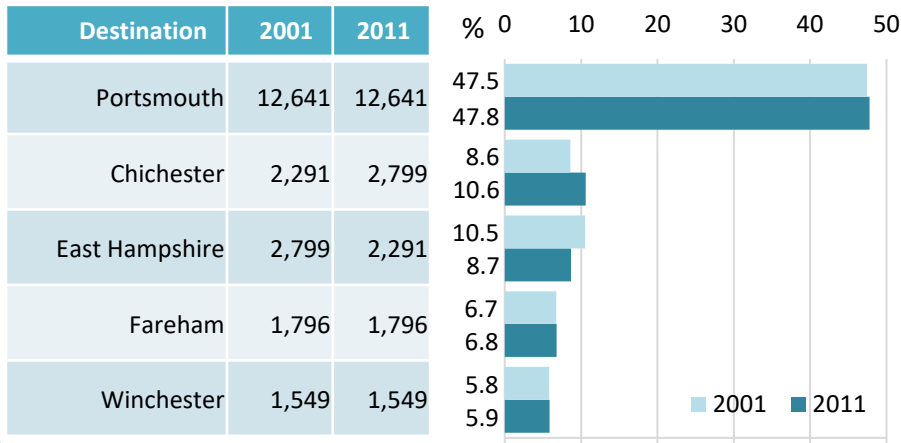

Commuter Flows and Main Method of Travel to Work

The Census 2011 commuter data measures workers aged 16yrs+, while Census 2001 data measures workers aged 16-74yrs. Comparisons between the census numbers should be used with caution due to the difference in age bands, natural population growth over time and economic conditions at the time of census collection which affect worker numbers. The percentage values provide a better relative comparison, although not strictly measuring like-for-like.

Top Five Destinations of Out-commuters

Number and percentage of total employed Resident Workers

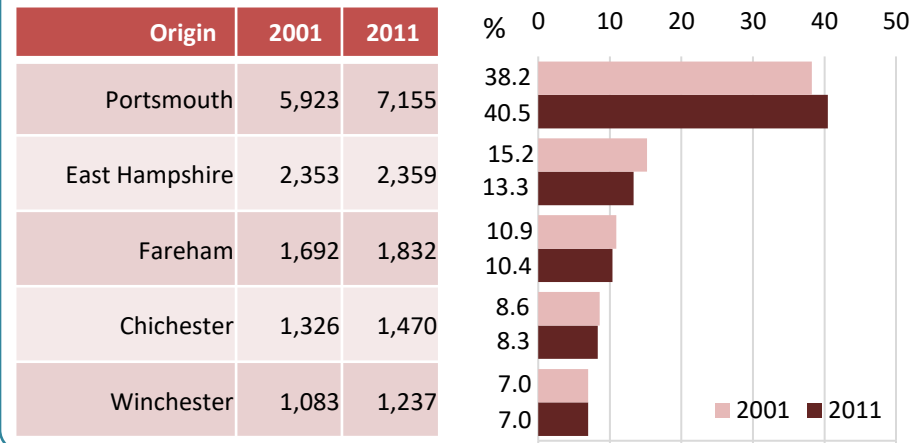

Table ranked by Census 2011 figures with the figure for the same area given for 2001

Top Five Origins of In-commuters

Number and percentage of total employed Workplace Workers

Table ranked by Census 2011 figures with the figure for the same area given for 2001

Main Method of Travel to Work

	2001	2011
Car/Van	33,321	36,344
Homeworker	4,293	5,043
On Foot	3,972	4,042
Car/Van Passenger	3,976	3,414
Bus	2,802	2,529
Bicycle	1,993	1,639
Train	1,311	1,627
Other	1,342	1,237
