

Adults' Health and Care

Update for care providers

18 June 2020

Coronavirus (COVID-19) Mobile Access to the Capacity Tracker

Dear Provider

Thanks to everyone for your continued efforts to update the National Capacity Bed Tracker with your care home status. The information that you provide is extremely valuable for health and social care colleagues to be able to direct specific support with regards to testing, infection control and workforce resilience.

The NHS England Capacity Tracker Team have now made it possible for care homes to update the tracker information from a mobile phone. This will give you added flexibility in how you can monitor and update your records. [The leaflet](#) provides you with guidance on how to access the capacity tracker from your mobile phone, with further contact details provided if you need assistance with access.

Regards

HCC Commissioning Team
