

Central Southern Regional Framework for Electric Vehicle Charging Infrastructure

Framework Customer Access Agreement

Welcome to the Central Southern Regional Framework for Electric Vehicle Charging Infrastructure! This Framework has been procured through OJEU (Office for the Journal of the European Union) and you do not need to undertake a further costly supplier procurement process, as it has already been completed.

The Framework offers the Public Sector a “one stop shop” for Electric Vehicle Charging Point (EVCP) delivery and management. The “open protocol” approach to Electric Vehicle charging is important to promote a common vehicle charging solution, ensure that a consistent quality user interface is delivered across the region for public and public sector organisations, and can be accessible to drivers nationally.

The Framework includes the following opportunities for any public sector organisations or Trust to understand, develop and deliver their requirements for EV charging:

- Feasibility
- Installation and deployment
- Adoption of existing charging points
- Charging point service and management

The locations for charging points can be for all areas and assets within the public sector estates and facilities, including: public car parking, public sector and fleet charging, on street and off street car parking, staff home charging, and any facilities considered within the overall jurisdiction of the public sector.

The Framework will be open to all public bodies in and around:

- Berkshire
- Devon
- Dorset
- Hampshire
- Isle of Wight
- Oxfordshire
- Surrey
- West Sussex
- Wiltshire

This includes: County Councils, Unitary Authorities, City Councils, District and Borough Councils, Town Councils, Universities, Further Education establishments, National Park Authorities, Housing Associations, Police Authorities, Fire and Rescue Services, other Emergency Service organisations, Health Services, Academies, Schools, and the Ministry of Defence.

The Framework Supplier has been selected for their knowledge, technical skill and quality and also their commercial standing and ability to access private and grant funding to support your funding or investment needs. The Framework offers, as a minimum, the following opportunities for you to:

- Collaborate with the supplier to develop feasibility and identify options.
- Engage with the supplier instantly if you have already carried out a desk top assessment of your requirement and know what you are looking for.
- Purchase directly any amount of Feasibility, Installation and Service & Management activities to suit your estate and your needs. The Installation, Management Service and Maintenance standards have already been identified for you.

For all of this, the supplier has provided not to exceed rates and offers income share, within an agreed set of Framework Terms and Conditions.

More information on the Framework is contained within the Framework User Guidance.

To access this Framework:

If you wish to access the Framework and the Guidance document, with the supporting contract and commercial information, please complete the following “Framework Customer Access Agreement” and return it to the Energy Team at Hampshire County Council, by email to:

energy@hants.gov.uk

By completing the Framework Customer Access Agreement there is no obligation or commitment to contract services.

The content of the Framework documentation that you will receive is confidential and intended for the recipient only. Please do not disclose or share any part of these documents with a third party, without our written consent.
