Hampshire County Council and local health services (NHS) are asking for practitioners’ views as part of a review of some services for children, young people and families exploring how we might better integrate our work.

We want to hear from the people who have worked or are working in or with these services:

- Health Visiting Service in Hampshire
- School Nursing Service in Hampshire (not including special school nursing)
- Community Therapy Services in Hampshire (i.e. speech and language, physiotherapy and occupational therapy)

We are also keen to hear from others who are working with children, young people and families in Hampshire to help develop our understanding about how these services communicate and interact with the wider health system.

We want to be able to design services that are useful to those who need them, are easier to access and achieve better outcomes for children, young people and their families.

Please tell us about your experiences of these services and how you think these services could be improved.
