

# 3D GIFT TAGS

Fun to make gift tags with a 3D twist!

## You will need:

- A selection of black and coloured card
- Metallic pens
- Craft foam shapes
- Metallic curling ribbon

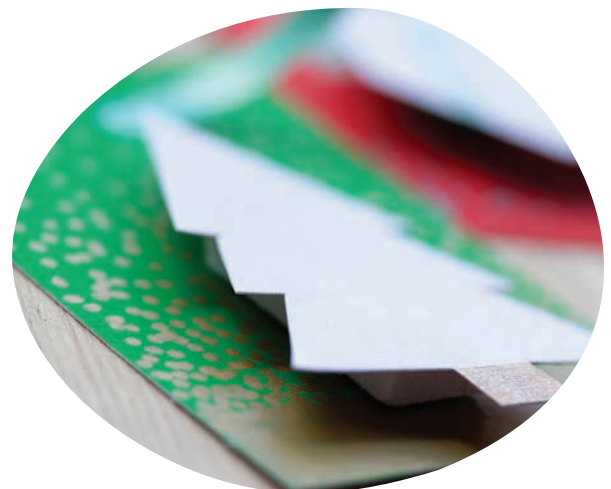

## Other things you'll need:

- Glue and scissors
- Ruler and pencil
- Hole punch

## How to make it:

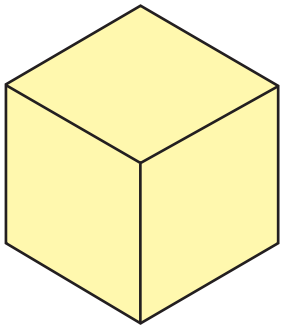

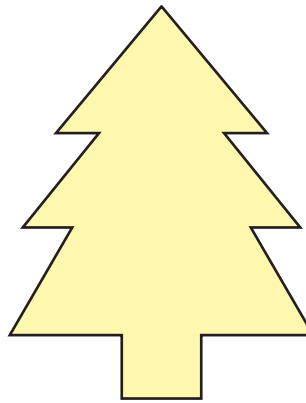

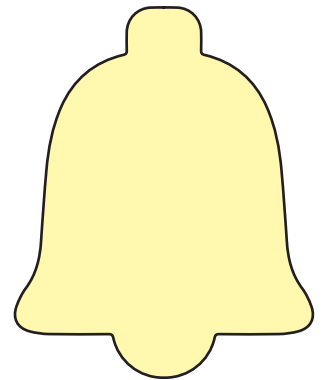

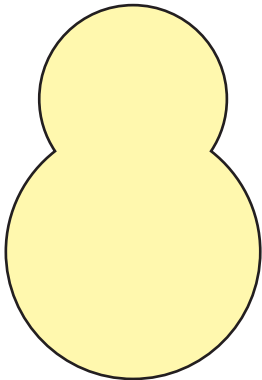

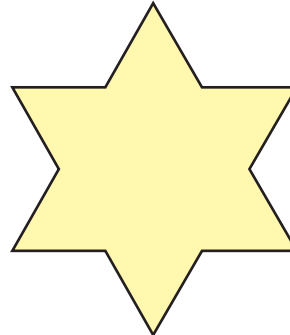

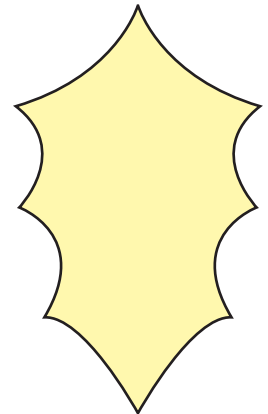

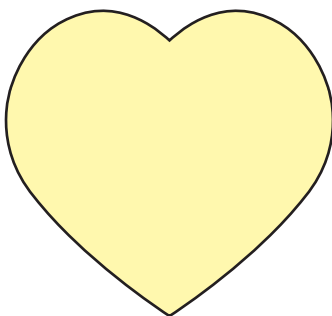

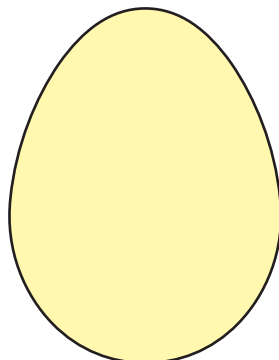

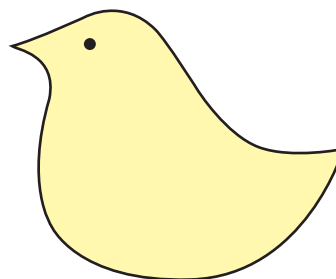

- 1 Take a sheet of black or coloured card. Using a ruler and pencil, draw a rectangle. A suggested size is 5 x 7cm as this will make 16 gift tags from 1 sheet of A4 with minimal waste. However, you can make the gift tags as big or small as you like. Cut out the rectangle.
- 2 Decorate the rectangle of card using metallic pens.
- 3 Next, take a second sheet of card and draw a festive shape. There's a selection of shapes on page 2 of this how-to guide which you can trace or copy. Carefully cut out the shape.
- 4 Decorate the cut out shape with metallic pens. Allow the ink to dry before moving to the next step.
- 5 Take a craft foam shape and glue it to the underside of the cut out shape (you might need to trim it to size first). Then glue it in place on the card rectangle. Set aside to dry.
- 6 When the glue is dry, use a hole punch to make a hole in the gift tag. Thread the hole with some metallic curling ribbon. Now all you need to do is write your message on the back and attach the gift tag to a gift.

**IDEA:** If you find it too fiddly to cut out the shapes, why not try using some pre-cut paper shapes instead.
