Dear Councillor Kendal,

**Environment and Transportation Select Committee Recommendations –  
06/11/2012**

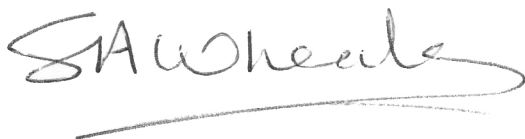

The Environment and Transportation Select Committee, at its meeting on 6<sup>th</sup> November 2012, heard from the Environment and Transport Department on 'Electric Vehicle Charging Points', prior to your consideration of the topic as part of your decision day. Following the report, and further questions from Members, the Committee agreed the following recommendations:

1. That the Environment and Transportation Select Committee agrees with the recommendations as set out in paragraphs 5.1 – 5.4 of the Executive Member for Environment and Transport's 'Electric Vehicle Charging Points' Decision Report, subject to an assurance that all of the pilot study sites selected in Hampshire will include both 'trickle' and 'rapid' (direct current) electric vehicle charging points.
2. That outcomes of future lobbying related to electric vehicle charging by Hampshire County Council are communicated to the Chairman for notification to the Select Committee.

We therefore would like to invite your views and response to the above recommendations.

I look forward to receiving your response.

Yours sincerely

**Councillor Sharyn Wheale  
Chairman, Environment and Transportation Select Committee**
