

**TYPICAL DETAIL OF WORKING**  
SCALE: 1:200

(A) Soil Striping :  
Soil placed in separate areas to allow for some of the depth loss of erosion!

When possible plant to work on top of a separate level

**Soil Level Reduction**

(C) Striping of Stone or Fibre mat with 2.0m of granitic depth of 0.5m

SOIL HORIZON

GENERAL HORIZON

RAVINE SAND HORIZON

**TYPICAL RESTORATION WORK**  
SCALE: 1:200

(D) Soil Placement: Minimum Green Island Form Change

Must carry to work on top of separate level of soil with top surface of the same

(E) Soil is placed over a fibrous mat with long roots associated on the side on any possible ridge areas

RAVINE SAND HORIZON

**TYPICAL DETAIL OF SOIL PROFILES TO CREATE RIDGE AND LINE**  
SCALE: 1:200

Average Soil Depth over 27.0m wide Ridge and Pans are 0.5m
