# Essential Numeracy Course

## Would you like to improve your numeracy skills?

Strong numeracy skills are essential in everyday life and also in many workplace tasks. Multiply are offering FREE short Essential Numeracy courses which entail an introduction to the maths principles taught on the Functional Skills courses.

This course is aimed at adults aged 19 and over who do not currently have a Level 2/GCSE maths at grade 4 (previously known as grade C) or for those who think it will help their career progression to go back into learning.

An experienced and caring tutor will offer all the help needed to boost maths confidence. At the end of the course an assessment will be carried out to determine the Functional Skills level the learner will undertake if they chose to continue.
