

Balance (Unspent) of Scheme Specific Allocations as at 20/21 Year End

Economy, Transport and Environment Department

Please note that individual contribution allocations to projects can be amended, added or removed multiple times throughout the year before they are committed, depending on changing project funding requirements or to better fit with the terms of spend stated in the originating legal agreement. Although every effort has been made to ensure the table below accurately reflects the allocations status as it was at the end of 20/21 financial year, please be aware that it does not necessarily reflect where the contributions are currently allocated (at the time of publication), or on which scheme the contribution will definitively be spent on.
