NOTES

- General arrangement supplied by Client
- Grid shown is OS National Grid
- Hydrographic survey18:07:24. Depths in metres reduced to Chart Datum, underlined figures are drying heights.
- Refer to drawing 11003/11 for sections.

INFORMATION

Soundings - Blue figures indicate depths below Chart Datum. Red figures are above Chart Datum.

MLW mark is defined in this location as 1.3m Above Chart Datum. This is shown as 1.3

Dredging - the red hatched area shows the proposed dredge area, the depth of removal being 1m. The green hatched areas indicate the expected slopes, these will not be physically dredged but allowed to form naturally, this is a common approach in such situations.

Previous licensed dredge areas - these are shown in orange and provided as an indication of previous dredging works in the area.

Sections AA, BB & CC are shown on drawing11003/11.

Tide levels from Admiralty TotalTide

Acronym	Height above CD
HAT	5.0m
MHWS	4.5m
MHWN	3.8m
MSL	2.95m
MLWN	1.9m
MLWS	0.8m
LAT	0.3m
