

# A Green Economic Recovery for Hampshire

## PROJECT OBJECTIVES

A Green Economic Recovery for Hampshire project:

- Understanding what a green economic recovery means for Hampshire, using Hampshire 2050 as a starting point.
- Articulate a direction of travel by identifying key areas which are critically important for a green economic recovery in the current context; and
- Work with local partners to develop an action plan focusing on those critical areas.

# APPROACH

- **January – February**
- Explore what a green economic recovery means for Hampshire, using Hampshire 2050 as a starting point.

- Assessing the state of play
- Conducting 2-3 deep dive analysis e.g. Analysis of jobs and skills in sectors considered critical to a green economic recovery.

- **February – March**
- Test with stakeholders the initial priorities identified in Phase 1.

- Analysis of initial priorities.
- Stakeholder roundtable to test priorities.

- **March – May/June**
- Work with key local partners to develop a practical action plan focusing on those areas critical to a green economic

- Review current Council powers to address the priority areas.
- Policy Labs - participatory process to develop action plans for priority areas.

## Summary of activities
