Refreshments	-
Workshop Session 2 – Key Issues & Priorities	Mike C
Next steps	Mike C
Lunch	-

Demographic and societal challenges

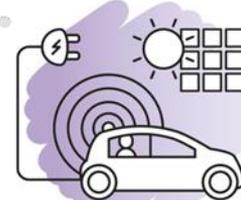

Economy

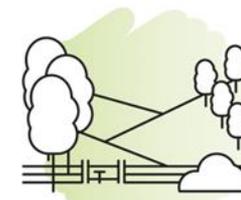

Work, skills and lifestyle

Environment and quality of place

Mobility, connectivity and energy

Rural Hampshire

Feedback 1

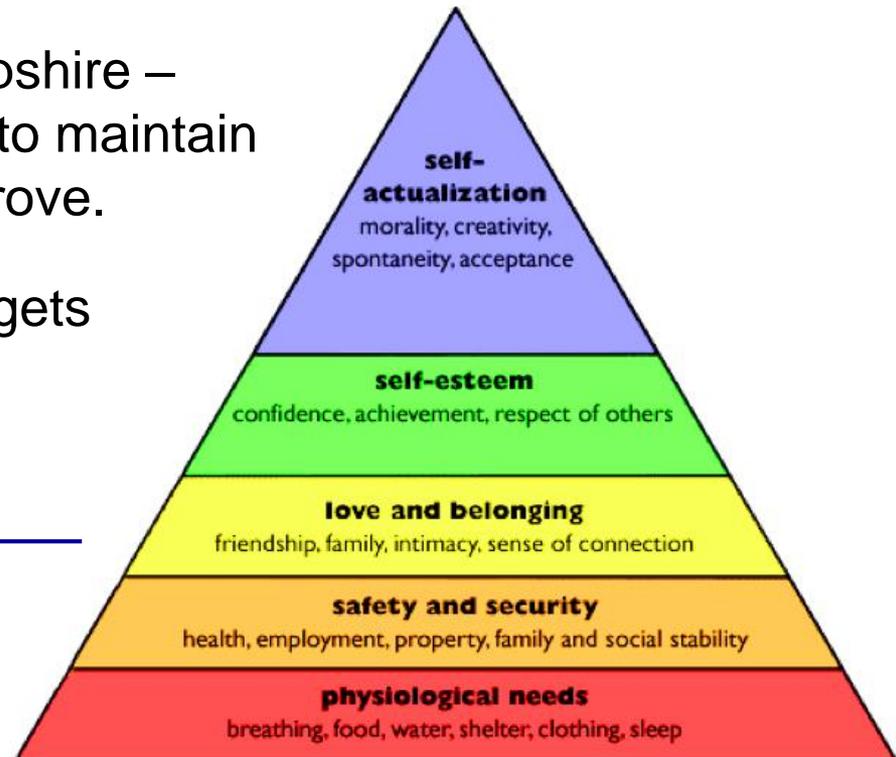

- Lots of feedback which we will share with Commissioners;
 - The following points were what the group wanted us to feed back today;
1. Accessibility and coverage of public transport is a concern, particularly for rural Hampshire and ageing populations - reductions can increase isolation.
 2. We need to help young people engage and connect more with their communities; mental health issues and drug and alcohol use is increasing.
 3. A digital workforce is good but what about carers / social workers - pressure will increase with an ageing population and there is currently no career.
 4. We need to build communities, not just houses - new infrastructure needs to be provided.
 5. Cuts to services are impacting everything from mental health, Police, education etc. and a huge reliance on the voluntary sector is not sustainable.
-

HAMPSHIRE 2050

VISION FOR THE FUTURE

Feedback 2

1. Catering for diversity is critical – if not the result will be increasing divide and isolation.
2. Need to engage with citizens – a citizens panel could be helpful to validate outcomes.
3. How will the outcomes of the Commission be implemented and resourced and for how long – need to be clear about the commitment.
4. Consider what is the baseline in Hampshire – agree what is good now that we want to maintain and what isn't good and needs to improve.
5. It may be useful to set aspirational targets for each priority / theme – e.g. Maslow's Hierarchy of Needs
