

Hampshire Public Health Team

Protecting, improving and reducing unfair differences in people's health.

Healthy lives, places and communities

We help shape healthy places and support people to stay well at every stage of life at home, school and work.

Respond to health risks

- We prepare for health risks like disease outbreaks, extreme weather and environmental hazards.
- We respond to public health emergencies when they happen.

Prevent illness and reduce risk

- We prevent illness and reduce health risks.
- We run programmes to help people stay healthy.

What we do

Work with partners to make places healthier

- We develop healthy ways for people to travel around.
- We create living and working environments that promote health.

Support people at every age to be healthy

- We organise services for people of all ages.
- We support people to take action to improve mental wellbeing.

The way we work

- We base our work on what local people need.
- We work with the NHS, councils and community groups, and other local partners.
- We use data and evidence to guide decisions.

Healthy communities start with all of us.
