

# COVID-19 Weekly Update – 7<sup>th</sup> September 2020

*Data correct as of 7<sup>th</sup> September but subject to revision*

**Compiled and published by Hampshire Public Health**

**7<sup>th</sup> September 2020**

**Hampshire**  
County Council

# This report provides information on the COVID-19 pandemic in Hampshire and includes:

- COVID -19 infections – the total numbers of cases, rates within Hampshire's districts and overall picture across England
- Deaths - total deaths, which also includes those extra deaths above the number we would normally expect in Hampshire, over recent months

**STAY ALERT › CONTROL THE VIRUS › SAVE LIVES**

**Hampshire**  
County Council

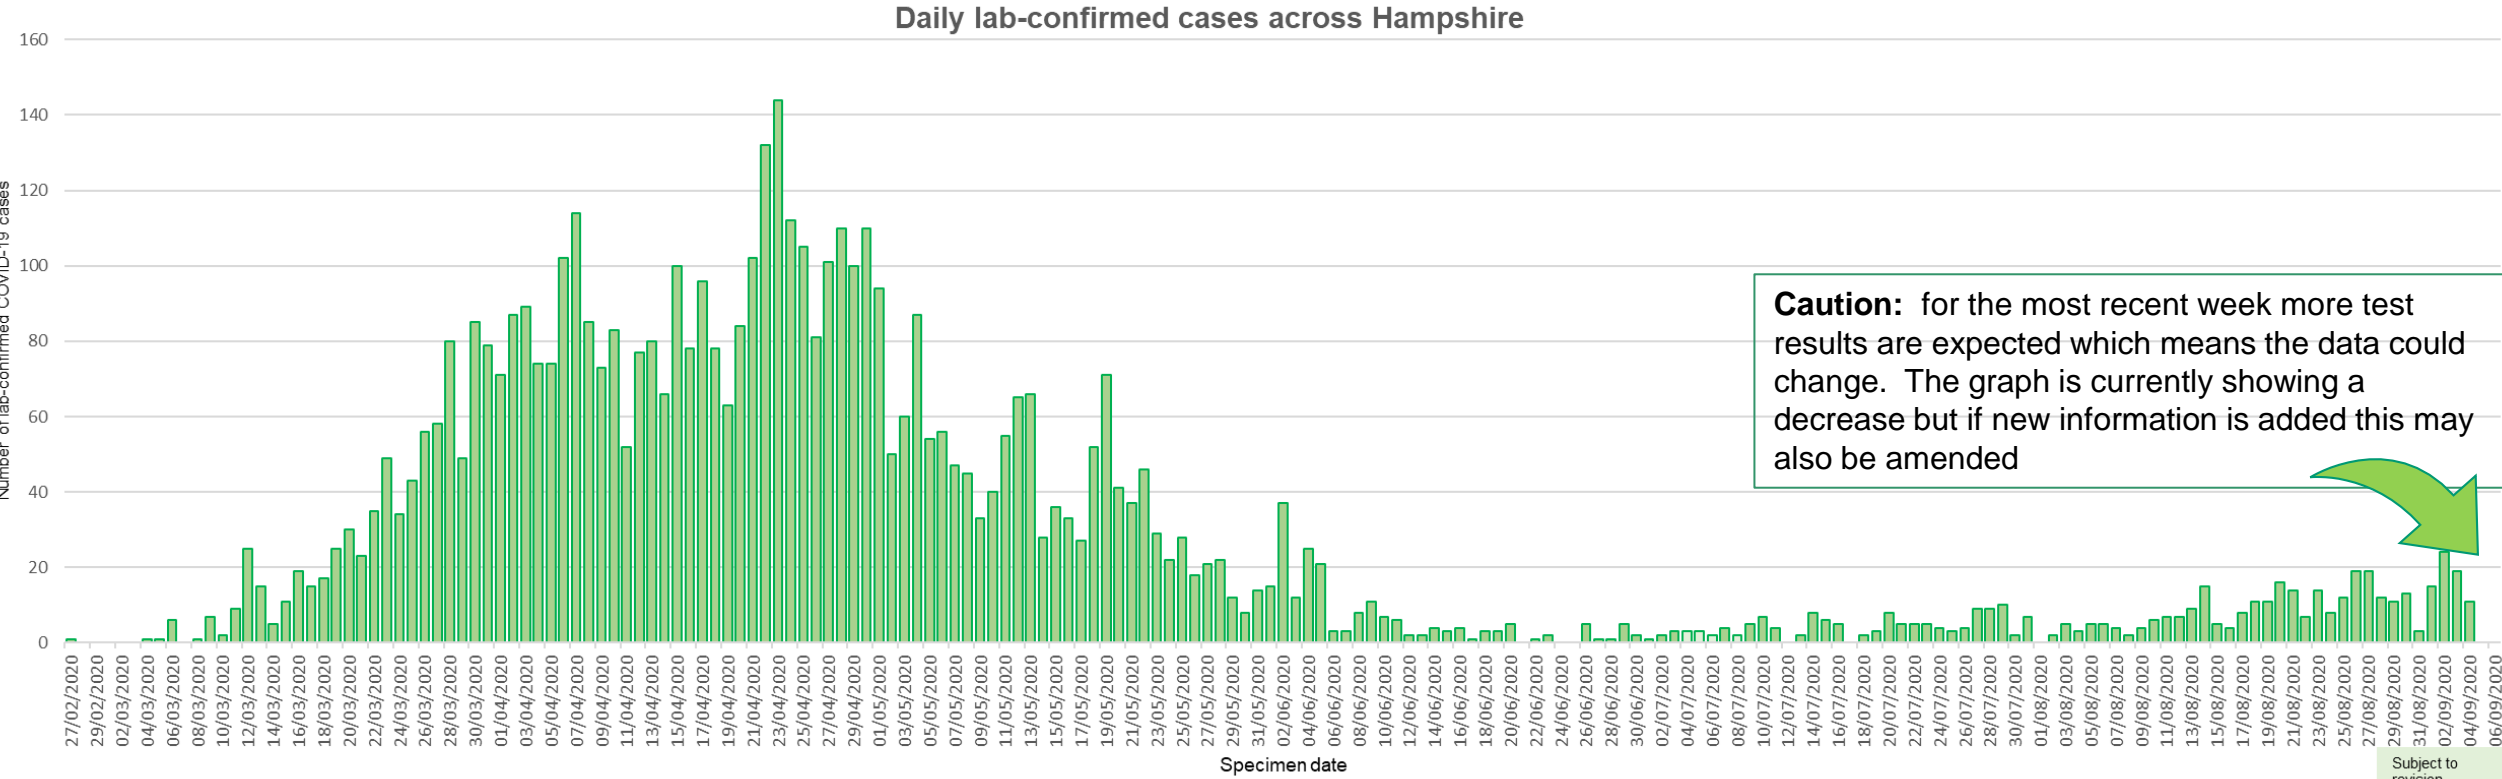

# Infections – daily COVID-19 cases in Hampshire showing how the epidemic has progressed over time – the ‘epidemic curve’

Overall, a slow increase in the number of infections from a low point at the end of June which may be levelling off

Total number of COVID-19 cases  
**5,456**

Data only includes those cases which have tested positive

Source: [PHE dashboard](#) (Last updated on 6<sup>th</sup> September 2020)

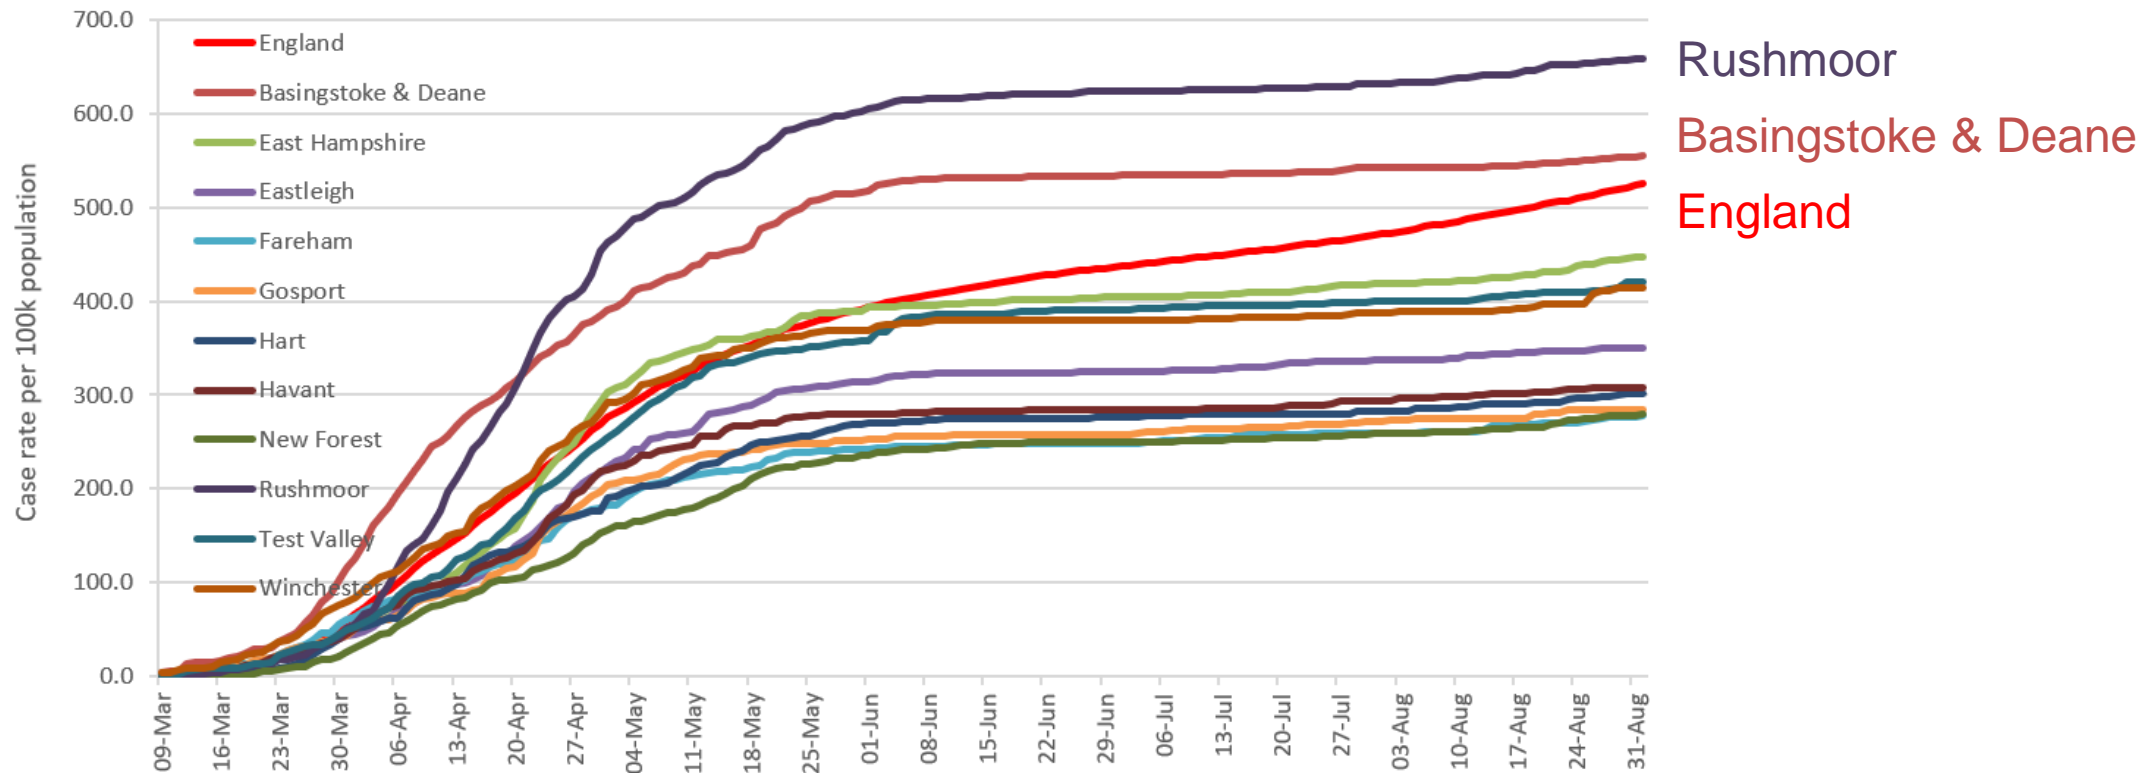

The data now includes all cases, those which have been tested by NHS/PHE laboratories and by the Government's commercial testing partners

# Infection rates – Total cases per 100,000 people across Hampshire Districts

- The trend in the total figures shows that the infection is slowly rising across Hampshire
- The highest infection rates have been in Rushmoor and Basingstoke & Deane districts, where these have been greater than the average infection rates for England

COVID 19 - Case rate per 100k population: Hampshire districts and England

Data for specimens taken between 21 August and 27 August as extracted on 01 September  
 Trend arrow indicates whether there has been an increase, decrease or no change between this week and last week (specimens taken between 14 August and 20 August)  
 \*Local authority is part of an area in which overall infection rates are high, with household transmission a key infection pathway.  
 † Within these Local Authority the interventions have been restricted to some wards  
 ‡ Northampton's increase in incidence is almost solely down relates to a workplace outbreak at the Greencore Factory  
 § Rossendale has been included as incident rates increased after table produced.  
 ¶ These Local Authorities are within Norfolk and relate almost solely to a workplace outbreak at Banham Poultry Farm.

# Deaths

Deaths due to COVID-19 are continuing to decline, - the latest weekly figure is **0**  
There have been no excess (extra) deaths above the number we would usually see at this time of year.

All deaths in 2020 by week, with proportion where COVID-19 is mentioned
