

# COVID-19 Weekly Update – 12<sup>th</sup> October 2020

*Data correct as of 12<sup>th</sup> October 2020 but subject to revision*

**Compiled and published by Hampshire Public Health**

**12<sup>th</sup> October 2020**

# This report provides information on the COVID-19 pandemic in Hampshire and includes:

- COVID -19 infections – the total numbers of cases, rates within Hampshire's districts and overall picture across England
- Deaths - total deaths, which also includes those extra deaths above the number we would normally expect in Hampshire, over recent months

# Infections – daily COVID-19 cases in Hampshire showing how the epidemic has progressed over time – the ‘epidemic curve’

Although infection rates since June have been lower, the picture is now showing an increase in new infections in Hampshire.

Total number of COVID-19 cases

# 6,918

Data only includes those cases which have tested positive

**Caution:** There is a data lag with more test results expected for the most recent week. Overall the picture is beginning to shift with the number of new COVID-19 infections increasing in Hampshire, emphasising the need to comply with current government guidance to control the spread of infection.

Source: [PHE dashboard](#) (Last updated on 11<sup>th</sup> October 2020)

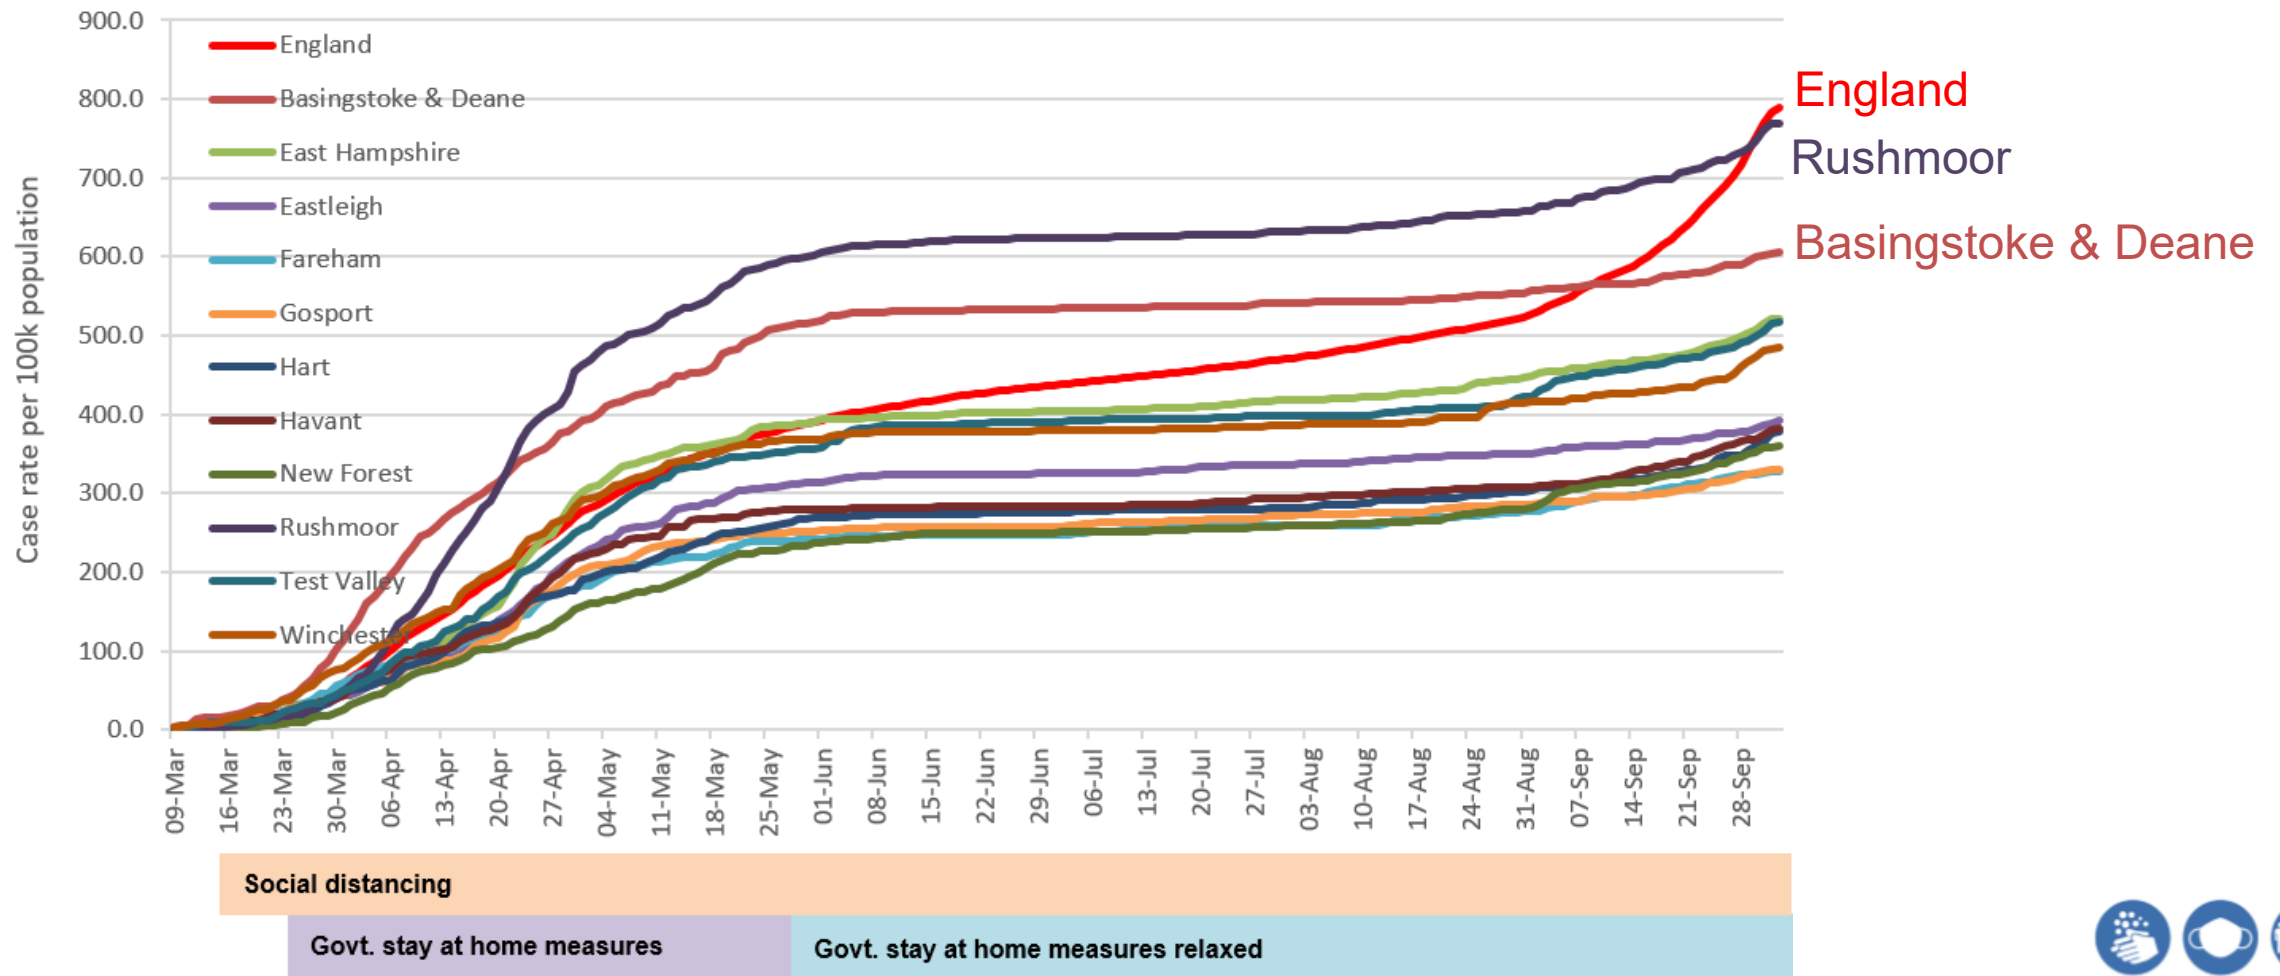

The data now includes all cases, those which have been tested by NHS/PHE laboratories and by the Government's commercial testing partners

# Infection rates – Total cases per 100,000 people across Hampshire Districts

- The trend in the total figures shows that the infection is slowly rising across Hampshire.
- The highest infection rate has been in the Rushmoor district, where it is now currently lower than the average infection rates for England.

COVID 19 - Case rate per 100k population: Hampshire districts and England

# Infections- number of cases of COVID-19 per 100,000 people across England

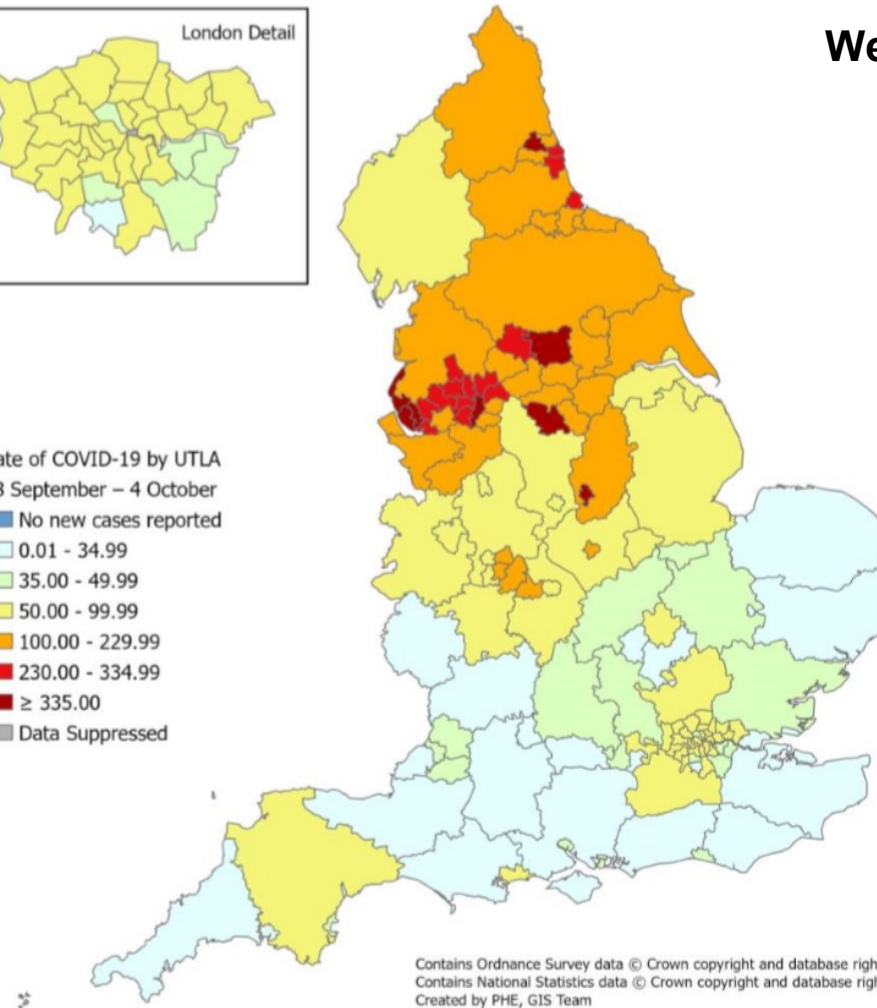

The epidemic is now no longer localised and is growing in all regions.

Detections of COVID-19 cases in England continued to increase in week 40. Case rates remain highest in the North West, North East and Yorkshire and Humber.

Weekly rate of COVID-19 cases per 100,000 population tested under Pillar 1 and 2, by upper-tier local authority, England (box shows enlarged map of London area)
