

COVID-19 Weekly Update – 14th August 2020

Data correct as of 14th August, but subject to revision

Compiled and published by Hampshire Public Health

14th August 2020

Hampshire
County Council

This report provides information on the COVID-19 pandemic in Hampshire and includes:

- COVID -19 infections – the total numbers of cases, rates within Hampshire's districts and overall picture across England
- Deaths - total deaths, which also includes those extra deaths above the number we would normally expect in Hampshire, over recent months

STAY ALERT › CONTROL THE VIRUS › SAVE LIVES

Hampshire
County Council

Infections – daily COVID-19 cases in Hampshire showing how the epidemic has progressed over time – the ‘epidemic curve’

Overall numbers of those infected with COVID-19 are decreasing, with occasional cases now occurring.

Total number of COVID-19 cases

5,158

Data only includes those cases which have tested positive

Source: [PHE dashboard](#) (Last updated on 13th August 2020)

The data now includes all cases, those which have been tested by NHS/PHE laboratories and by the Government's commercial testing partners

Infection rates – Total cases per 100,000 people across Hampshire Districts

- The trend in the total figures shows that the infection is levelling off across Hampshire
- The highest infection rates have been in Rushmoor and Basingstoke & Deane districts, where these have been greater than the average infection rates for England

COVID 19 - Case rate per 100k population: Hampshire districts and England
