

## Path Codes

Path codes are made up as follows: ParishCode / PathNumber / LinkNumber

[Links are the number of sections that a path is divided into (by junctions with other paths)]

For example: the code for Abbots Ann Footpath 1, link 1 is 001/1/1

It is possible to do a partial search on just the Parish code and path number e.g. 001/1 then it will show you all of the links on that path.
