Hampshire
County Council

Coordination Newsletter – October 2026

Welcome to the October 2026 edition of the Hampshire County Council Street Works Newsletter. The purpose of this newsletter is to keep stakeholders informed about major projects and operational update. It is not intended to provide advance notice of all significant works, as this is already accessible through other platforms.

The Street Works Team

Hampshire Street Works is split by area. Please click on the map to access the contacts for the team. This map is hosted online and is maintained with the latest contact details.

The works mentioned in this newsletter have also been plotted on a map. Please click on the map to view.

If you would like to submit information for inclusion in our next newsletter, please email sw.engagement@hants.gov.uk.

Reminders

🔥 **Hot topics:** these are the subjects that generate complaints from members of the public and Councillors. 🔥

Verges: we suggest taking photographs of verges before you start work to document any existing damage. You should also take photographs once site is cleared to show the condition of grassed areas after you leave. Please ensure that any damage caused to verges/grassed areas as a result of your work is made good before you leave.

Use of 15-minute road closures: please only use at sensible times

Working hours: please ensure all contractors and operatives are aware of permit conditions. We are seeing an increase in evening and night works in residential areas in breach of permit conditions. We have seen a few night works being undertaken during the day, resulting in lengthy delays.

Environmental Health: if you are planning to work in a residential area at night for more than one night, you must alert the local EH team.

Manual Control: the purpose of manual control is to control the traffic flow. Please ensure that the operative in charge is aware of any priorities at different times of the day.

Blocked Driveways: please consider notifying residents before blocking driveways.

Diversions: please remember that the shortest route is not always the best. We have seen an increase in wholly unsuitable diversions being selected, leading to damage to the highway, incidents involving the police, and irate members of the public. When applying for a TTRO, the applicant must confirm that a risk assessment has been carried out – please ensure that this is the case for all signed alternative routes.

Bus Stops: please remember to suspend bus stops if they will not be accessible due to your works.

Gentle reminder: please be careful not to include any of the streetworks named people in the permit information that will be displayed publicly on Causeway one.network

Please note wherever possible, works should be avoided in the New Forest during the school holiday periods. In addition, under the **New Forest Tourism Restriction, works involving long-duration positive traffic management on A, B and C roads** near tourist attractions, shopping areas, caravan sites or campsites **may be restricted from Easter through to the end of September.** Please consult the Coordination Team before submitting permit applications for such works.

Streetworks team news:

The Streetworks team is delighted to announce the appointment of **Oliver Lucy-Smith** as our new **Senior Streetworks Coordinator**.

This newly created position has been established to further strengthen operational performance and enhance coordination across the service.

Acting as a vital link between the Streetworks Manager and the Streetworks Coordinators, the role will support effective communication, promote consistency in decision-making, and help ensure the efficient planning and delivery of streetworks activities across the network.

Major Projects:

Botley Bypass

Please see information in the link for the works on the **Botley Bypass**:

[Botley Bypass | Transport and roads | Hampshire County Council](https://one.network/?GB142877454)

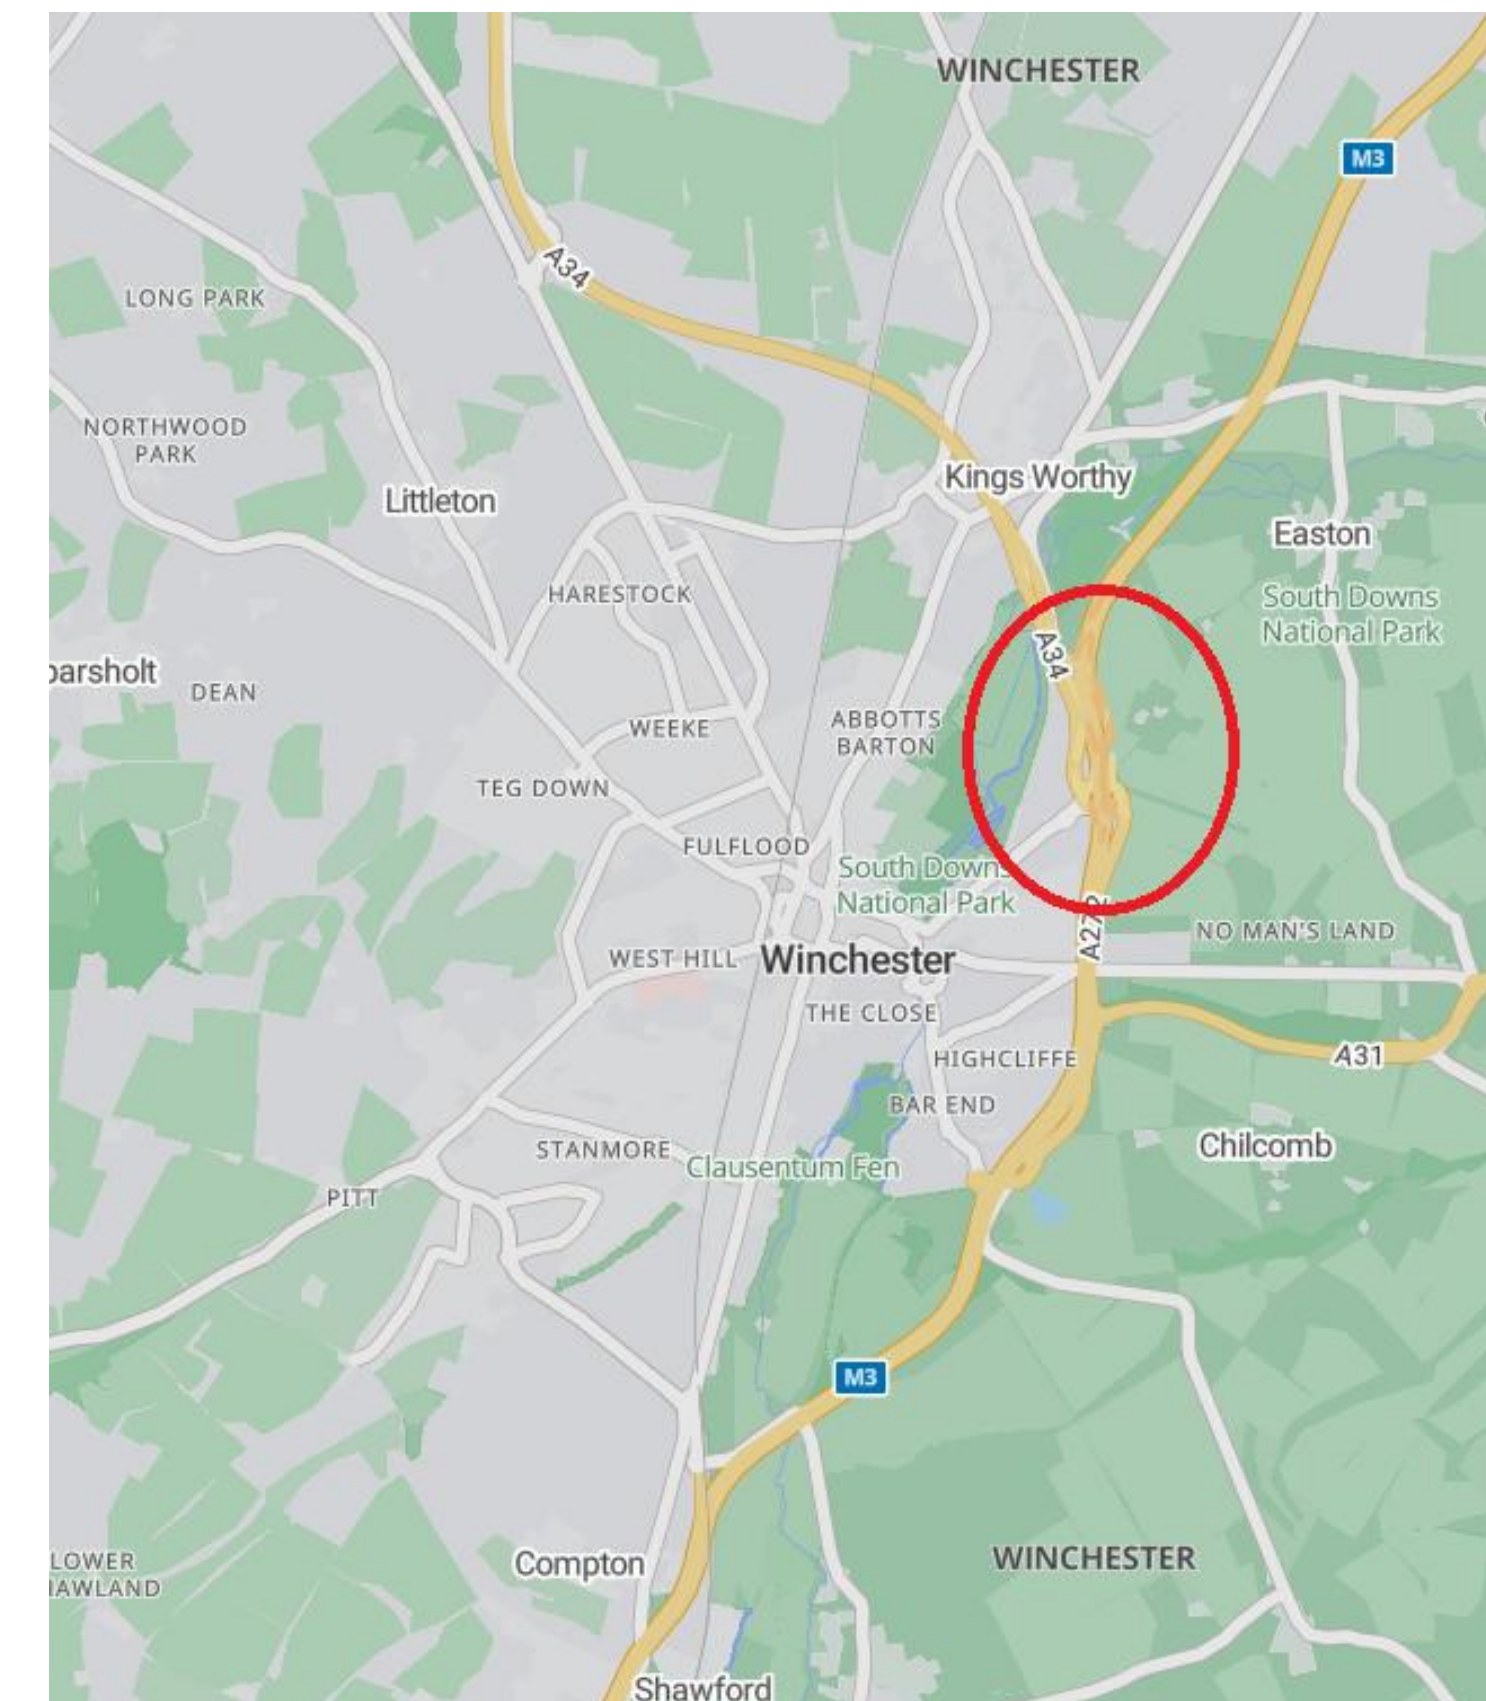

<https://one.network/?GB142877454>

The webpage includes latest news; monthly drone footage showing progress and background information including a CGI visual of the completed scheme

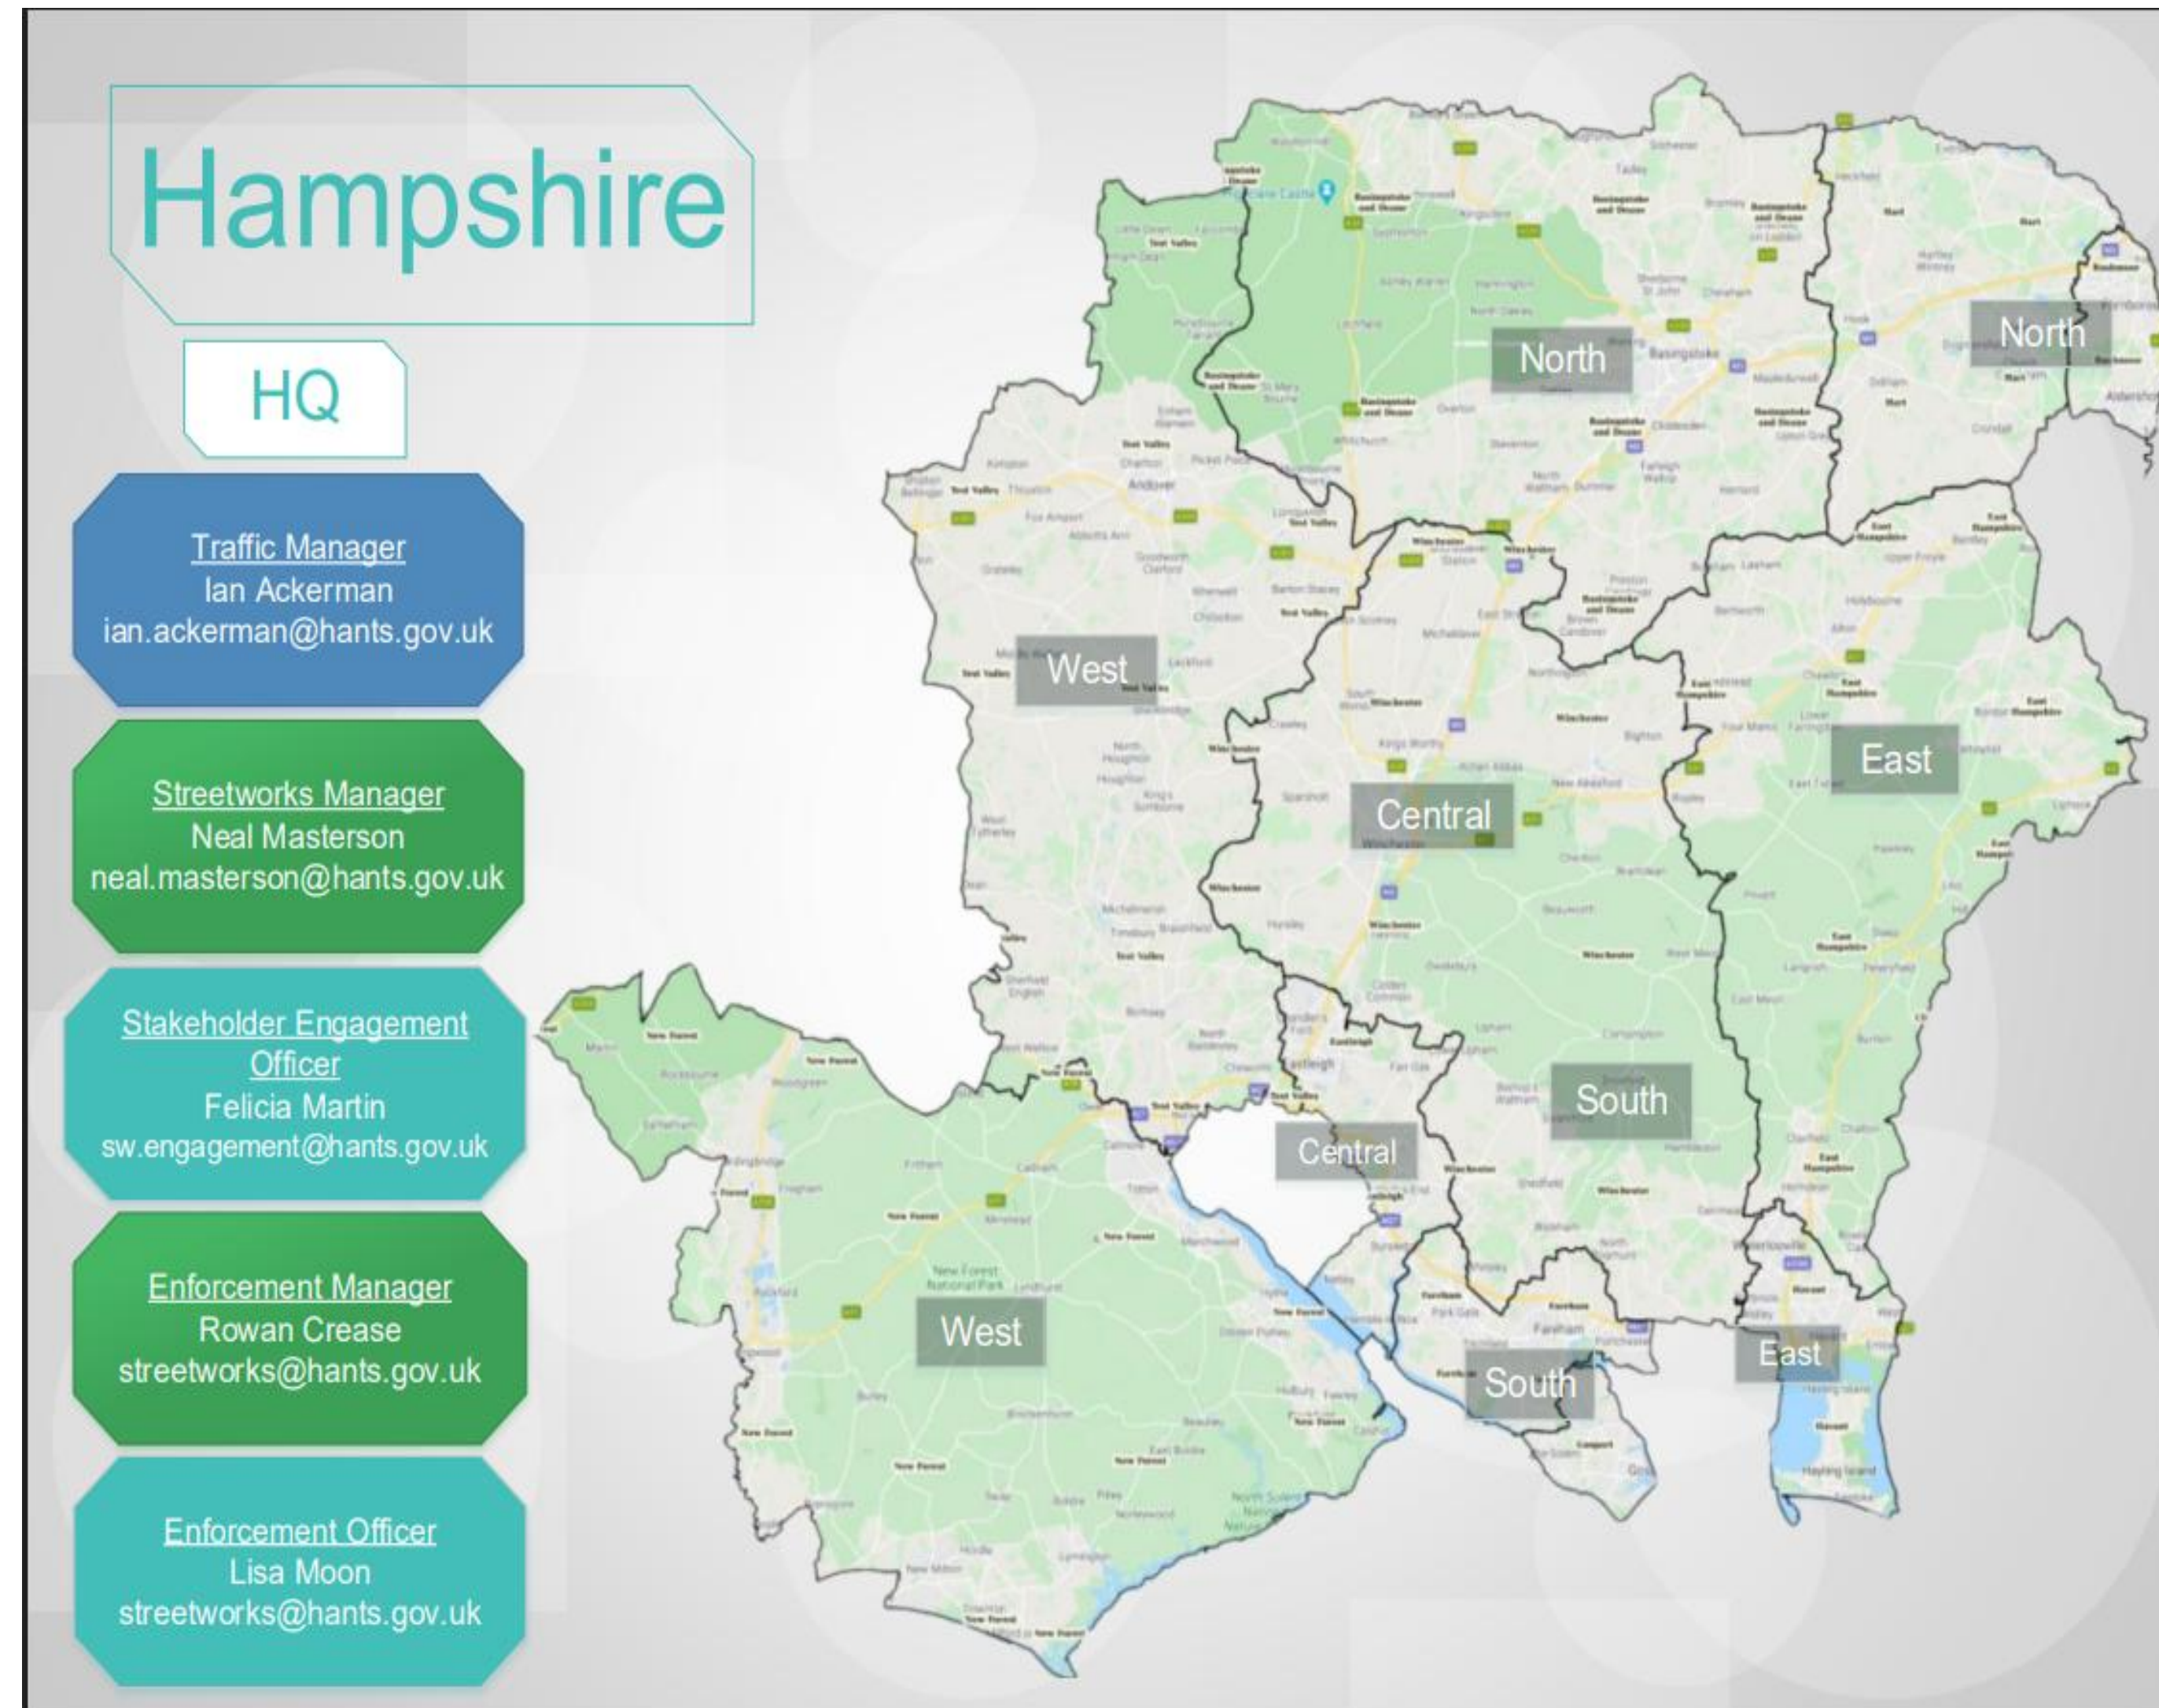

M3 Jctn 9 DCO Interchange Closures

- <https://nationalhighways.co.uk/our-roads/south-east/m3-junction-9-improvements/>
- From Jul 31st the Northbound entry onto the M3 is now closed until Feb 2028. Additional traffic now anticipated to route through Winchester and use the A33.
- Recent weekend closures of the gyratory have been successfully managed with minimal disruption
- Additional closures (mostly overnight) of the junction and surrounding network still needed throughout the project. These will be publicised and mitigations communicated as needed.

**Paultons Park – A36 Romsey Road,
Ower**
*School holiday works restricted due to
high visitor numbers*

Remembrance Events – November 2026

As November approaches, a large number of Remembrance events and services will be taking place across the county. Throughout the month, and particularly around Armistice Day and Remembrance Sunday, communities will come together for parades, services, wreath-laying ceremonies, and other commemorative events.

Many of these events will involve temporary road closures, traffic management arrangements, parking restrictions, or increased pedestrian activity in town and village centres. As a result, we would like to remind everyone to be mindful of these events when planning works and activities during this period.

Where possible, please take local Remembrance events into consideration when programming works, particularly where they may impact access, traffic flows, event venues, participants, or attendees. Given the number of events taking place across the county, early planning and coordination will be important in helping to minimise disruption and avoid potential conflicts.

By considering these events at the earliest opportunity and liaising with relevant stakeholders where necessary, we can help ensure that works are delivered efficiently while allowing communities to mark these important occasions safely and respectfully.

Think Festive. Think Traffic. Think Trade.

As we head into the Christmas period, we're asking all promoters to take a common-sense approach to roadspace planning.

Please avoid works near retail parks, shopping areas, schools, places of worship and other locations likely to see increased seasonal traffic. The aim is simple: reduce disruption, support local businesses and keep Hampshire moving during one of the busiest times of the year.

We're generally happy to see works continue in residential areas, provided sites are cleared, reinstated or significantly reduced before Christmas week.

This isn't a blanket embargo, it's about sensible planning and collaboration.

A list of routes and locations requiring particular consideration can be found in Section 13 of the [Hampshire County Council New Roads and Street Works Guidance](#). **Please note this is not an exhaustive list. It should be used as a starting point, with promoters expected to consider any location where festive traffic, local trade or community activity could be significantly affected.**

Local Government Reorganisation

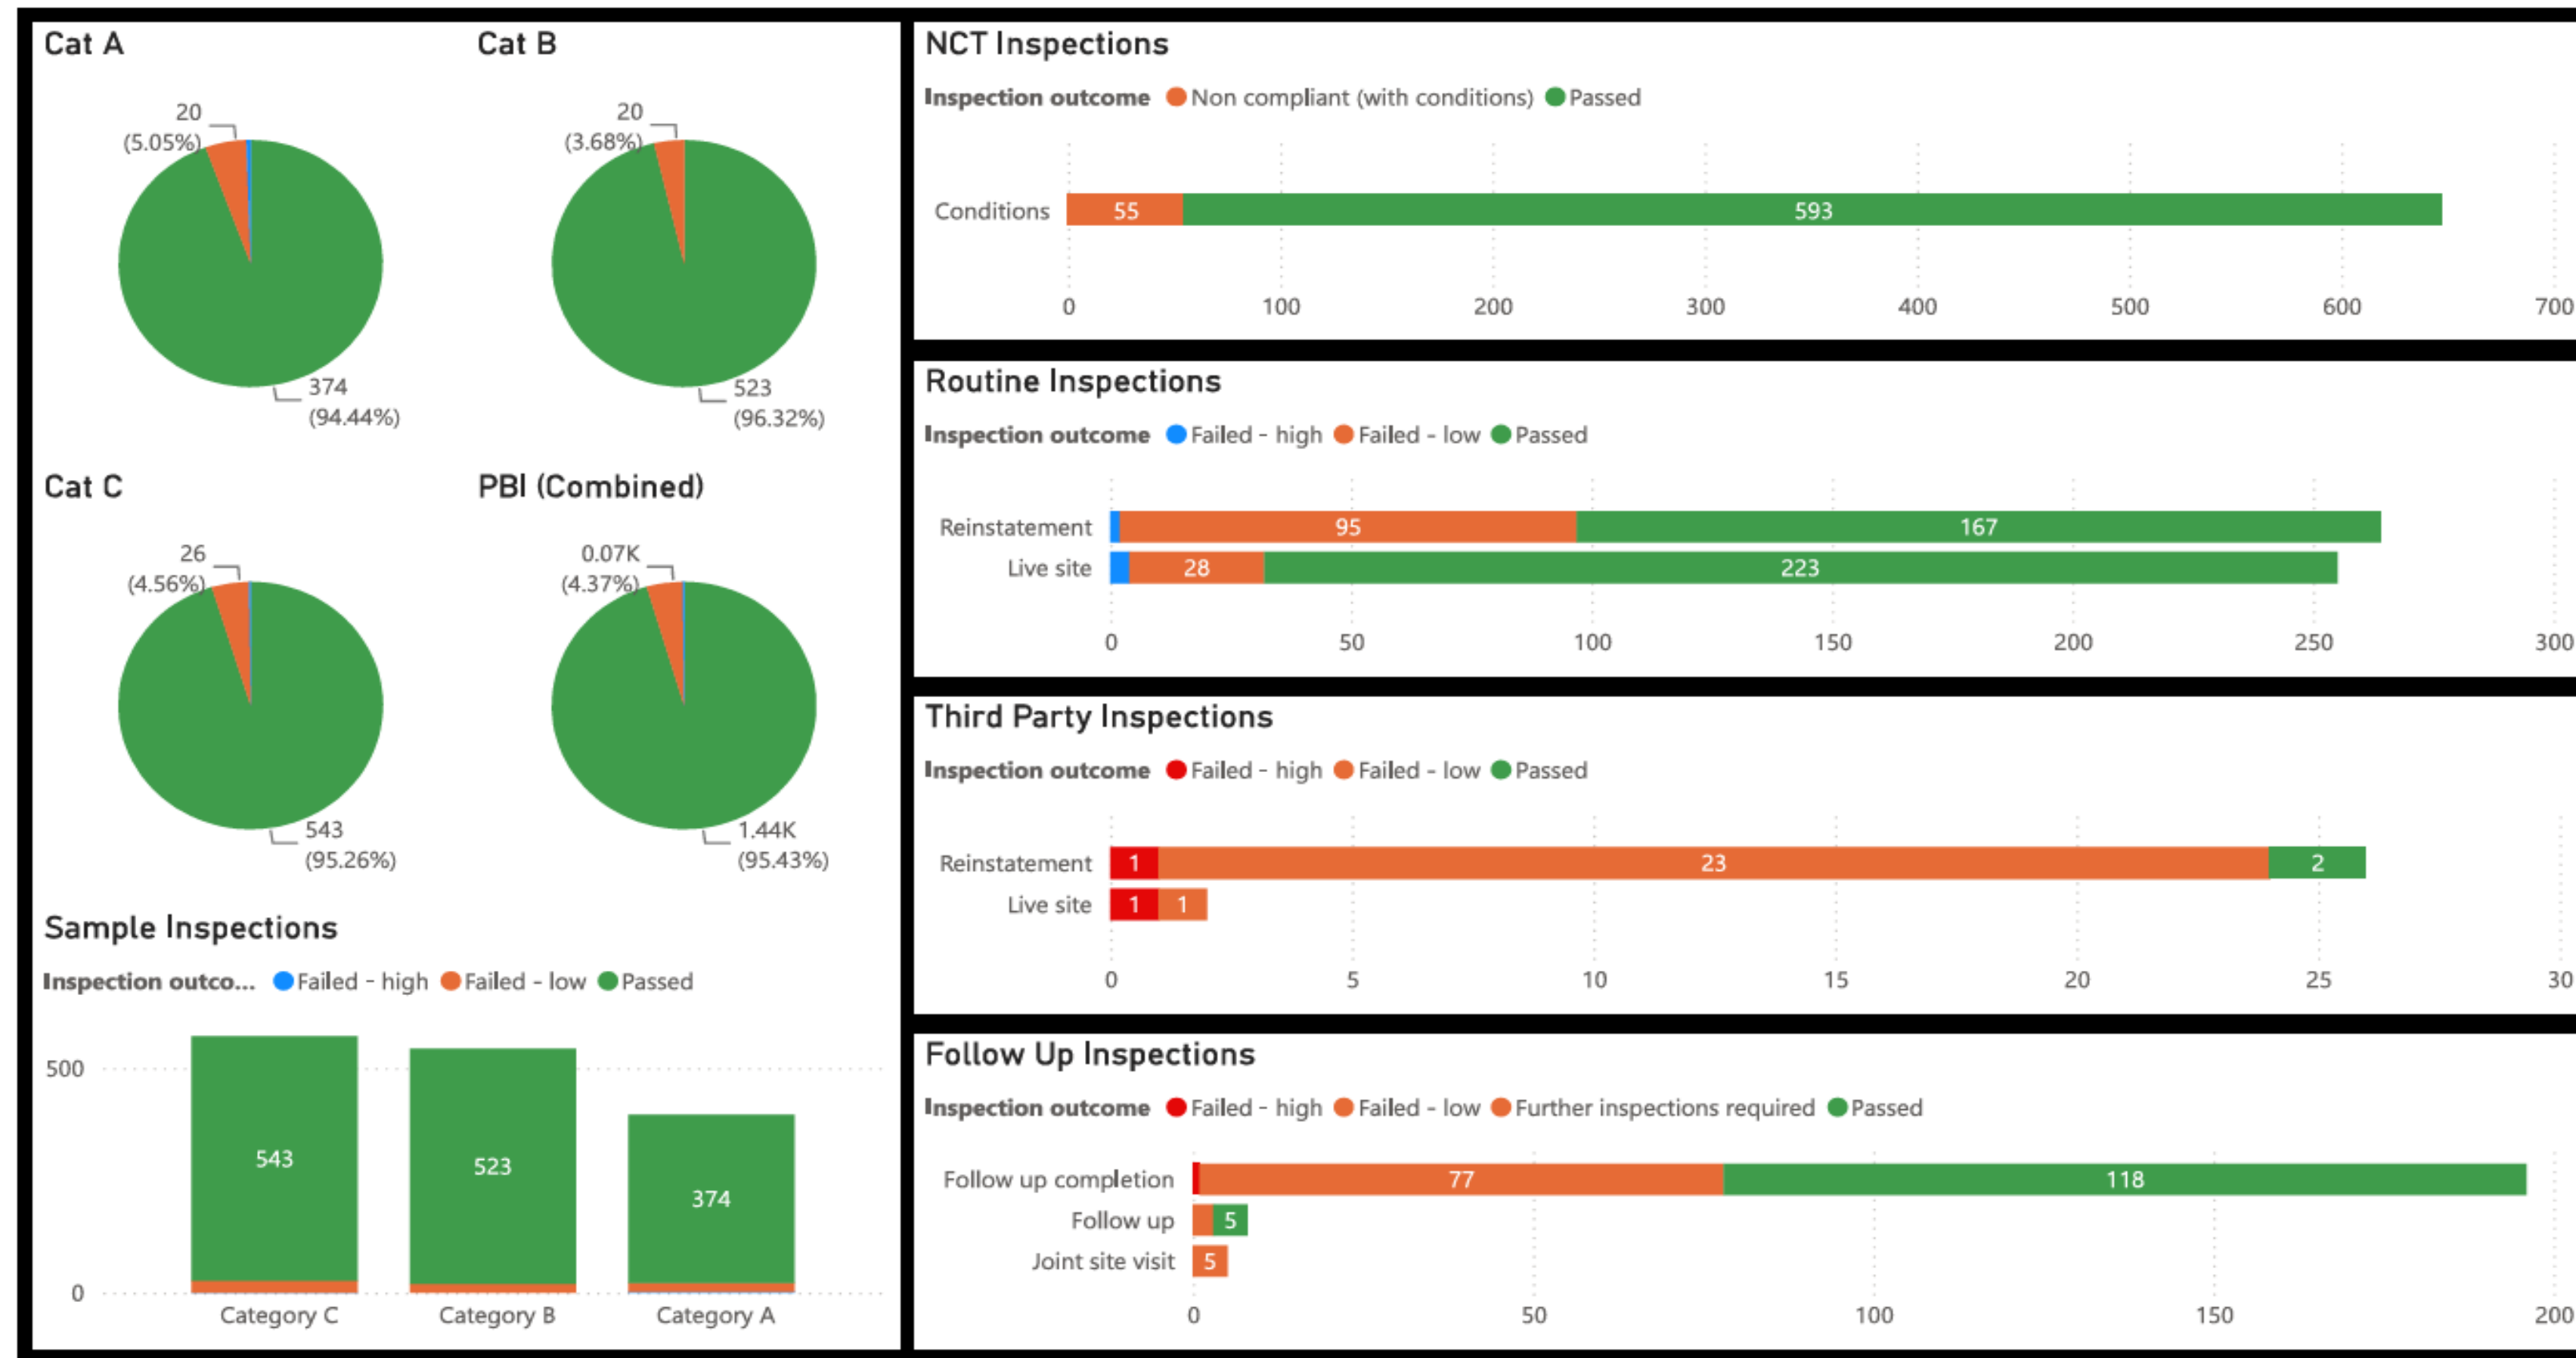

The Government has announced that it has halted LGR for all but a few councils. LGR development in Hampshire has now stopped, although some ongoing reviews of various aspects will continue where the review is considered to provide a benefit and can be implemented outside the context of LGR.

We currently have no further information on whether LGR will recommence or re-appear in a different format at some point in the future.

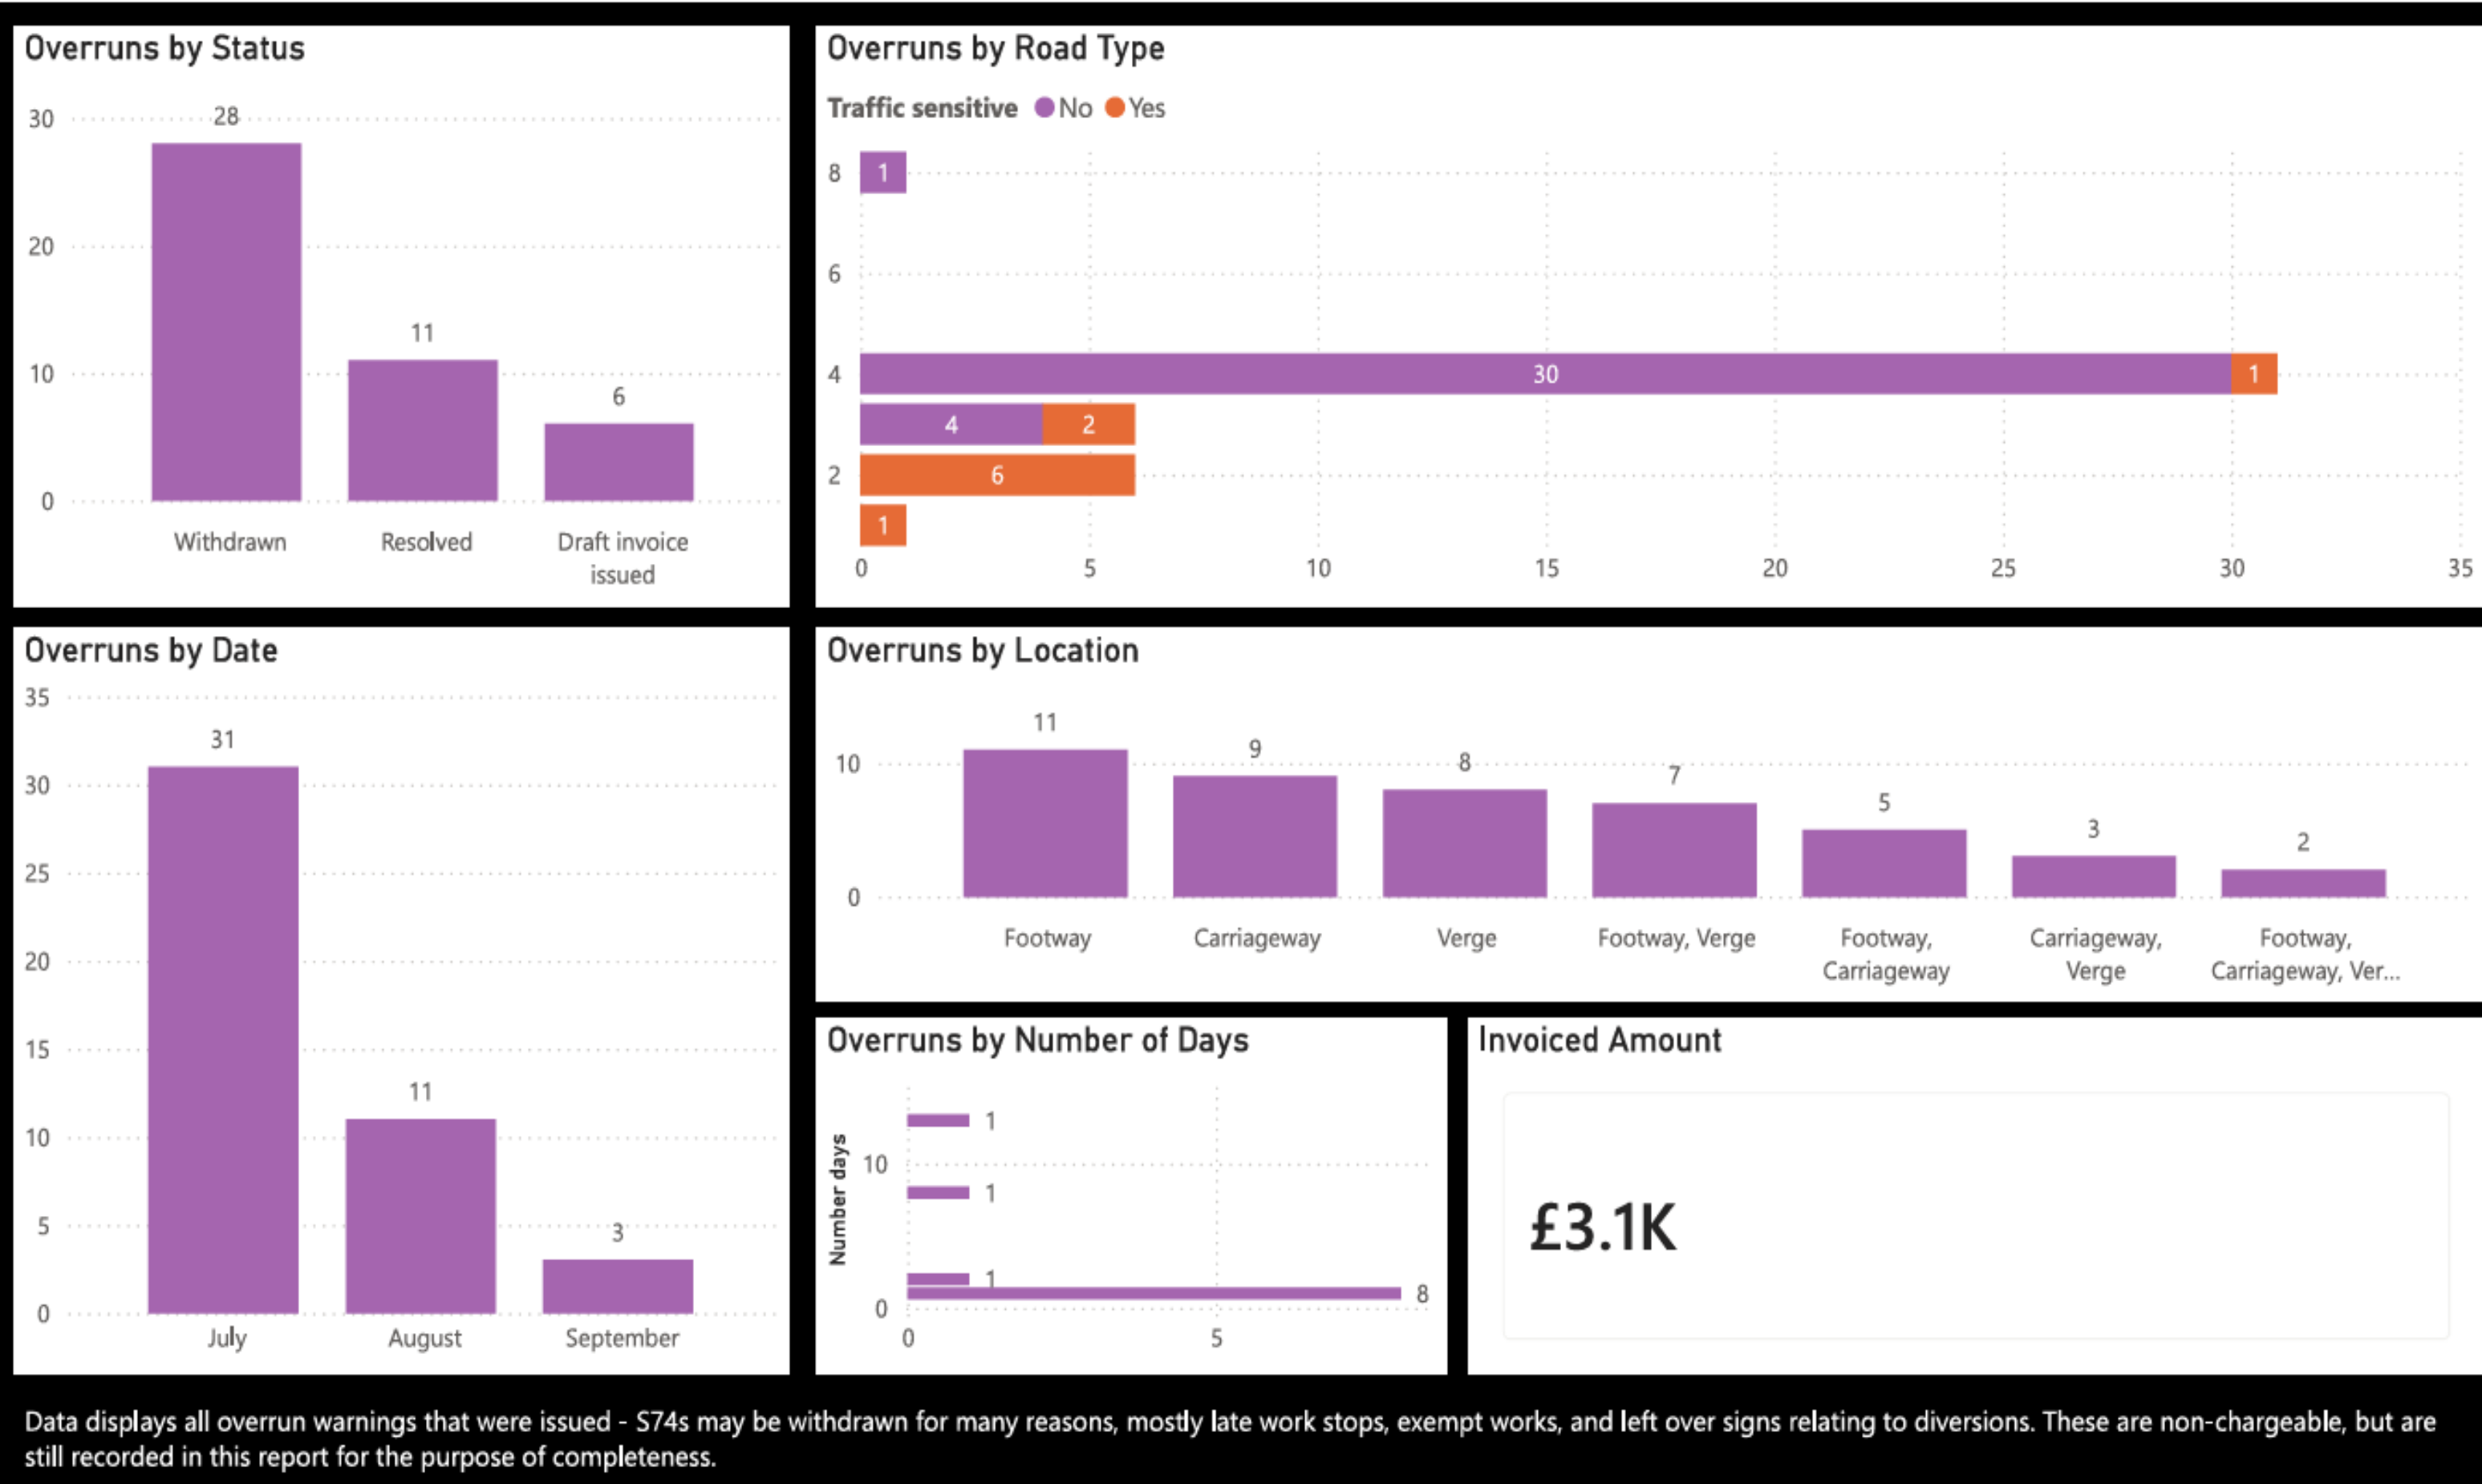

Local elections will still take place in May 2027 based on existing boundaries.

HCC's web page has been updated accordingly: [Local Government Reorganisation | About the Council | Hampshire County Council](#)

Reg 20 details

Offence details

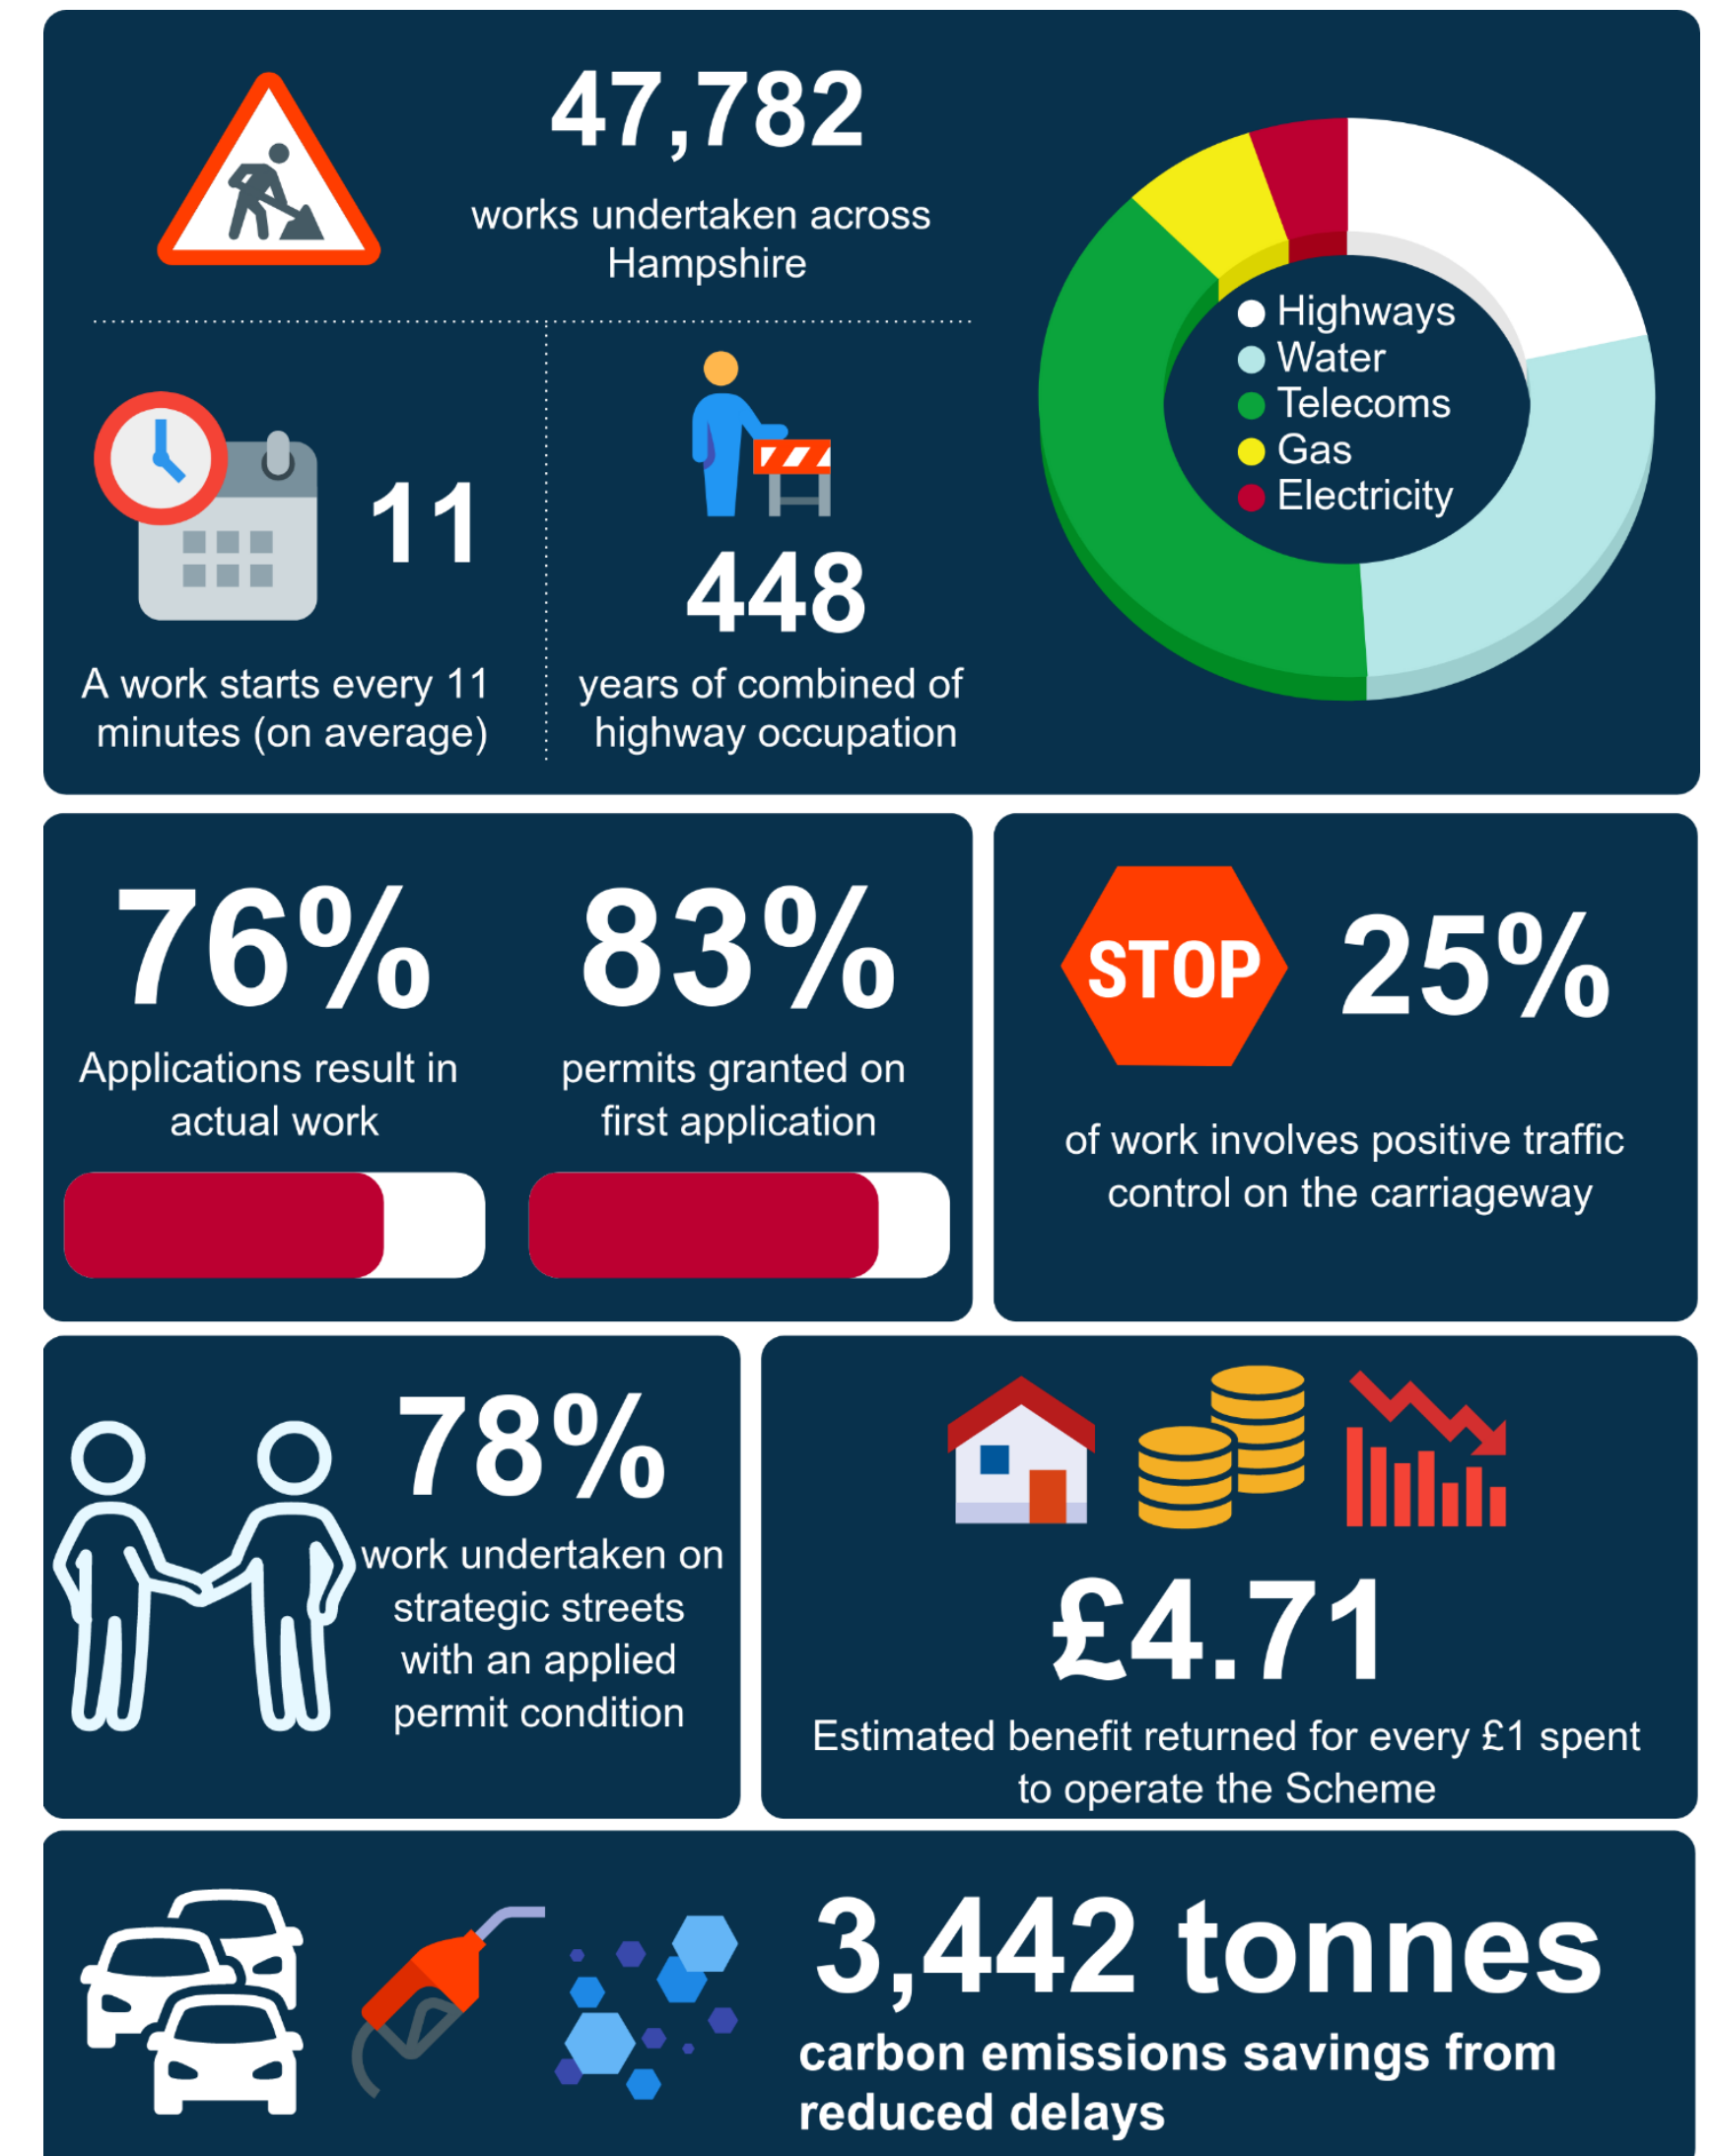

- 02A Barrier and footway board in place at time of inspection.
- 11B No AWS in place
- See conditions inspection
- 05A Works extend past Cheriton Close approximately 20 yards from Stockbridge Road roundabout.
- 08B No TM operative on site or manual control being carried out.
- 11b No AWS in place.
- NCT02a - NCT02a 09:30 - 14:30 all other times highway to be kept clear - Positive TM including TTL and Ramp have been on site 24/7 for permit duration. Before 09:30 and after 14:30.
- NCT02A Works in place at 08.20
- NCT11A Permit number not in place
- NCT05 Permit for road closure only. Ancillary information does not cover TTLs in Hursley Road as traffic sensitive.
- NCT05 Works carried out under TTLs rather than No Carriageway Incursion. Change request was submitted and refused while works were in progress.

Lane Rental Scheme Progress

- Scheme documents / consultation added to HCC website:
<https://www.hants.gov.uk/transport/highways/utilitycompanies/lane-rental-scheme>
 - Following discussions with the DfT an additional consultation has been carried out over Summer 2026.
 - Second consultation outcome will be published in autumn 2026
-
- TS review notified in July 2025.
 - Review of TS notification comments conducted alongside the network comments received from the LR consultation.
 - Evidence for each USRN affected is available on request
 - Revised TS classifications now added to gazetteer

Permit Scheme 'Highlights'

- 2022 to 2025 report circulated previously. A summary report has been added to the HCC permit Scheme web page:
<https://www.hants.gov.uk/transport/highways/county-permit-scheme>
- Scheme is working well, but a financial review is needed as the scheme has recovered more than it cost.
- The County Council is developing a process to resolve the over-recovery of funds.
- Additional staff being employed to manage volumes of permits

The infographic shows a yearly average from 2022 to 2025
