

## Proposed road alterations

**Priority build outs along Oakhanger Road through the Village.  
Missing footway link to the Village Green.**

### The issues:

- Anticipated increase in the volume of traffic through Oakhanger Village as a result of the opening of the Whitehill & Bordon relief road.
- Anticipated increase in traffic using Oakhanger Village as a short cut.
- No off-road footway link from the southern half of the Village to the Green.

### The project:

- The introduction of kerbed and signed build-outs complete with priority signs at intervals along Oakhanger Road.
- Reconstruction of the existing buildouts at the village green.
- New footway link to the Village Green from the existing path at Holly Cottage to White Rose Cottage.

### The expected results:

1

The new physical build-outs will introduce obstructions in the road requiring drivers to adjust their speeds to negotiate around the islands.

2

Interrupting the flow of vehicles traveling through Oakhanger Village to dissuade vehicles from using Oakhanger Road as a alternative route after the Whitehill & Bordon relief road opens in December 2018.

3

The creation of a new section of footway between Holly Cottage and White Rose Cottage will provide an off-road link creating a safer environment for pedestrians.
